

# OM SAI DOMAINS

HEMP AND CBD PREMIUM DOMAINS

An important issue in Hemp and CBD industry is that using parent brand on all the products and services in a still evolving market could pose challenges as clinical evidence and regulatory frameworks gradually step in. In such cases, premium domains help to establish subsidiary brands (Ex: Skincare, gummies, energy drinks etc.) at right time, streamline sector focused trials/pre-launch marketing and importantly, not only optimize sector specific post-launch marketing but also protectively insulate other brands when one of the brands needs realignment as per latest in-house/external post-marketing trials and regulatory stipulations. Thoughtful and timely acquisition of premium domains has a lot to offer for established as well as emerging businesses in Hemp and CBD space.
