

BrandB Business & Financial Consulting LLC

BrandB Business & Financial Consulting Overview

BrandB Business & Financial Consulting aims to reduce the statistical failure among startup businesses, which represents 82% of small businesses that fail due to cash flow problems, by directly working to build client credit profiles that provide a complete financial resume and roadmap to success for funding opportunities.

We assist clients in the areas of Business Funding Consultation and Loan Packaging, Business Formation, Marketing, Branding, Business Analysis, and Building A Business Credit Profile.

Most business startups rely on their own cash reserves to start and fund the business. They are unable to or have difficulty establishing business credit without having to become a personal guarantor for the business. Finally, most entrepreneurs don't understand how to build their business credit profile with vendors and trade references. A key job of any business owner or CEO is to understand revenue and cash flow and whether that will carry the company to a milestone that can lead to successful financing, or to a positive cash flow.

Who We Are - We are not a lender. We are loan packaging experts for small businesses (from startups to \$50 million in revenue). We offer a 15-point background check and map out a plan to improve your chances of getting approved with various lending institutions. Loan packaging effectively narrates the story of the business through financial statements, detailed projections, and a thorough explanation of how the loan would be utilized. Getting help from our loan consultants means the difference between maintaining the status quo and having the needed funds for growth.

In addition to assisting with loan documents, the loan consultant shares valuable insight into specific underwriting practices. Let us help businesses seeking credit sidestep the most common pitfalls.

It is our vision and mission to educate, inspire and train business owners across the United States and within the local Las Vegas area where we are located by helping strengthen and invigorate the entrepreneurial mindset. We aim to become an essential network provider by connecting attendees of our workshops and annual conference as well as local clients to services to help them achieve their aspirations, infused with business knowledge and resources where they can learn from Industry Experts. We aim to offer the ultimate business building game plan for people who seriously want to ignite their business's growth no matter whether they build online or face to face.
