Installation

1. Place the shower plate on a stable, horizontal and anti-slip surface.
2. Remove the stop block(Fig. 1).
3. Connect your garden hose (Fig.2).
4. Open water source to 75% of maximum flow. If you need higher water height, increase the water flow.
5. To test, step onto the center of platform, your weight will open the spray valve. If water height is too low, check your water source.
6. Turn the orange nut to regulate the angle of water spray (Fig.3).

Before use

- During hot days, release water from the garden hose before connecting to the platform to avoid getting burned.
- Working pressure:< 6BAR.

Storage

- Empty the shower, make sure there is no water inside the product. It is recommended to store the product inside your garage.
