ARTIST STATEMENT

I'm a Film-maker, Visual Artist, and stubborn. Relentless. A free spirit with high energy who's too often stranded in the tower. So here I am, at one with creators. I love adventures with boobytraps and minefields. A juggler who opens doors with her chin. So far I'm meeting the challenge wearing a smile and keeping my chin up.

I create public and privately commissioned artwork as well as a thriving studio practice. The installations and functional art that incorporate an elaborate tableaux of materials from brass, bronze, concrete, cement, glass, handmade paper, to acrylic chairs. Exploring a variety of different digital-imaging techniques that result in creating ribbons of a psychedelic spiral of dazzling computerized hues. These distorted abstractions printed onto cement, glass, etc., produce a pop-art effect giving the dual impressions of extreme flatness and elastic depth.

The artist as a communicator builds a cultural lexicon associated with the things of life and their connection to each other. The ordering of things allows me to hone the concepts and flesh out an idea fully resulting in a hieroglyphic shorthand that brings the disparate elements together... Complete.

"Fluorescent Swirls," a tiled print on glass, appear as moving curtains of translucent light, taking advantage of the reflected nature of glass, and "Greystone," an engraving on cemented plaster, has the effect of throne stones—ordered, and in motion.
