

Consent and Release Agreement for Microblading Technique.

This form is designed to give information needed to make an informed choice of whether or not to undergo the 3D Microblading, semi-permanent technique. If you have questions, please don't hesitate to contact us or ask your professional technician.

Although 3D Microblading , semi- permanent technique is affective in most cases, absolutely no guarantee can be made regarding the client's benefit from the procedure.

This is the process of inserting pigment into the dermal layer of the skin and is a form of tattooing. All instruments that enter the skin or come in contact with body fluids are sealed and sterilized before use and disposed of after use. Cross contamination guidelines are stickily adhered to.

Generally, the results are excellent. However, a perfect result is not a realistic expectation. It is usual to expect a touch-up after the healing is completed.

Initially the color will appear much more vibrant or darker compared to the end result. Usually within 5 to 7 days the color will fade 40% to 50%, soften and look more natural. The pigment is semi-permanent and will fade over time and will likely need to be fully touched up within 6 months to 1 year.

Photography Release Consent

We would like your permission to use your photos for advertising. For example, our studio portfolios, online and print adds, etc. Your consent is necessary regarding. Please **circle** and indicate with your signature if you would like your photos used or not used in advertising.
