

Olympics

The games began when city-states grew. Each one wanted to assert supremacy. So, they would send representatives to Olympia to become supreme in physical competition.

Zeus was a supreme God who is honored for his athleticism. Which is still celebrated in our world by the Olympics.

The olympics are a huge part of our worlds history history and to say the least ours are not as intense as they used to be.

The olympics started the development of military training. We use military training for protecting our countries.
