

Good Day Prospective Member,

Thank you for your interest in our flying club. Below are the requirements for the use of the field. We fly electric, glow, and gas at the field and have multiple events throughout the year, please refer to our club website "somersestrc.org" for further information. As the weather gets nicer there are multiple club members that fly both weekend and weekday mornings.

The club has trainer planes with "Buddy Box Technology" and a computer flight simulator available for flight training. It is highly recommended new flyers get some flight time on a flight simulator prior to attempting to fly your model or the trainer planes. The learning curve will be greatly reduced with this approach.

For junior members the local 4-H has a program suited for their age with flight training and hands on 4H meetings. The link is included on this form for more information.

How to become a Somerset RC member

1. Obtain an AMA adult or youth membership. This is required by the county park and the club.
2. Obtain a Somerset County Park flying permit. The permit is required by all club and non-club member to fly at North Branch park.
3. Complete the FAA registration as "Hobby", along with the TRUST exam.
4. Complete the Somerset RC application form and email to Dave Szabo at Docz1159@gmail.com. Membership is not required to fly at the field, but if you are out of county, club membership will bring your Park flying permit costs down. Club membership for an adult is \$30/year, junior membership is \$5.00/year. Payments can be made via PayPal at SomersetRadiocontrol@gmail.com, Check or Cash. Contact Dave Szabo for more details 908 872-8428.

Below are the links for the AMA, FAA, and County Permit

Please feel free to contact me with any questions or concerns you may have, James Barnes, Member at large 610-704-9391.

BROKEN PROPS MODEL AIRPLANE

Members get hands-on experience learning about flight theory, types and construction of model plane, as well as, learn to fly through free flight, control lines or radio control models.

Where: Ted Blum 4-H Center (1st Wednesdays), 4-H Center of Bedminster (3rd Wednesday)

When: The 1st Wednesday of every month at 7:30pm and the 3rd Wednesday of every month at 7pm

Somerset RC

<https://somersestrc.org/>

Somerset RC

Somerset RC is a multi-interest model airplane club. We have all types of aircraft including glow, gas, electric, scale, 3D, sport flying, and Pattern. The models vary in size from small electric to 40% gas. Unfortunately, turbines are not allowed. We all love to just come out, kick back, and spend some time, sharing stories with fellow modelers. We have several events for club members and offer free instruction to members. So, come on out and be a part of our club.

Meetings are 7:00 pm every last Tuesday of the month

we are currently having meetings via Zoom so contact Domecq for an email with the invite.
