Are you a STROKE SURVIVOR?

Participants are needed for a research study on hand and arm function in stroke survivors

Title: Effects of device-assisted practice of activities of daily living in a close-to-normal pattern on upper extremity motor recovery

Department: Physical Therapy and Human Movement Sciences
Principal Investigator: Dr. Jun Yao
Contact Person: Ray Arceo

Description: Longitudinal intervention study on hand and arm function in stroke survivors. **Eligibility Criteria:**

- Between 21-80 years old
- Able to provide informed consent
- At least 1 year post a stroke that affects only one of your upper limbs
- Some shoulder and elbow control, but limited hand function in the affected limb

You may be compensated for your participation.
