

I feel privileged and humbled to serve as President of this great organization. As I reflect on the past year, I am amazed at what the volunteers have accomplished. Each volunteer has played a significant role in growing SSEEEO and has volunteered countless hours to support our mission. Our new initiatives, Survivor 2 Survivor (S2S) which helps improve the quality of life for stroke survivors and caregivers after their stroke and Stroke Can Happen at ANY Age which educates Corporate America on the warning signs and risk factors of stroke continues to flourish. Stroke survivors never give up and together WE can make a difference in the fight against stroke! **- Phyllis Weiss, SSEEEO President**
