

Innovative Design

- German-engineered and patented
- **High-efficiency vertical power tube PV-Module:** Our 360-degree energy yield module, drawing light from all directions with high-performance monocrystalline cells picks up direct and indirect sunlight
- **Self-cleaning PV:** Unsusceptible to dust, sand, and snow
- Proven in extreme weather conditions, hot and cold.
- Beautiful sleek design
- Premium material and components
- Easy plug-and-play installation
- **Flexibility in placement, on and off-grid:** Great for off-grid solutions like parks, walking trails, etc.

Add-On Features

German Engineered
THE HYBRID DIFFERENCE

- WIFI and Cellular Inbuilt (AI & IoT Integrated)
- 360° Surveillance Camera
- Civil Protection Systems
- Smart Controller
- Battery Pack
- Integration of IOT Sensors
- Hybrid On or Off-Grid
- Auto Lighting
- Cylindrical PV Solar Tube
 - 360° Energy Yield
 - Compact & Self-Cleaning
 - Performance-Based Design
 - High Conversion Efficiency
- Weather-Proof LED Display

BUILDING A SMART FUTURE

Innovative solutions for a smarter, sustainable future

smartoptimalsolutions.com

Working together ... building a smart and sustainable future.

Our promise is to deliver uncompromising integrity, environmental stewardship, continuous research and emerging technologies to our customers and partners searching for reliable and affordable Smart energy solutions.
