Tips and Tricks? Most templates are encrypted or color-coded, or have a small sample image showing how the image is finished. Therefore, there are no absolute tricks to the Paint by Numbers activity, but remember the main key to this activity: Patience and relaxation. Patience is key, especially when trying to complete higher levels or complex color patterns. Numbers and code can be intoxicating! But don't worry, you can relax if you take the time to do it like artideal for copies, but probably too smooth for colored pencils. Therefore, no matter what methods you want to use in this action. Craftsmen can use templates for various projects, parents who need different learning methods at home, and adults who need to relax quickly and easily as painting can also be good for health. How is painting favorable to your health? When it comes to the American Art Therapy Association, painting is one of the art therapies that can help children explore their feelings and resolve the various emotional conflicts they experience. After all, it helps them to understand themselves and control various negative behaviors. Meanwhile, research on the University of Otag explains that the positive aspect of painting is that it can help maintain mental health. Thus, for 10-20 minutes, painting can help relieve stress and anxiety for both children and adults. It has been found that adding color to items on paper can be an interesting therapeutic method that causes a person to concentrate well and reduce anxiety. The color of the activity according to the figure has different levels, from light to complex painting patterns such as Zentangle or Mandala. Because children like to play with colors from the very time, it should be noted that painting for adults or seniors is less stressful for the brain to be active, but it also has a soothing effect due to wonderful colors and patterns.
