 TINY HOUSES &
 RETROFIT BATHROOMS

Hydraloop Cascade

Modular, scalable, and
 made-to-measure

FOR MULTI-FAMILY HOMES
 AND LARGE BUSINESSES LIKE
 HOTELS, STUDENT HOUSING,
 SPORTS CLUBS AND MORE

Hydraloop designs and manufactures decentralized water recycling products for new builds and retrofits. We offer a wide range of innovative, sustainable, and IoT-connected water recycling devices for residential and commercial real estate.

ACT WISE
USE WATER TWICE

The easiest and most efficient way to reuse water is to clean it right where you use it – decentralized.

A Hydraloop device cleans greywater from shower, bath, and washing machine, as well as condensation water from tumble dryer, heat pump, and air conditioning. It can be reused for toilet flushing, washing machines, garden irrigation, and topping up swimming pools.

Our devices use a unique, patented combination of sustainable water treatment technologies that ensure the highest water quality and create a sustainable future.

We offer turn-key products and made-to-measure solutions for projects of any size. Give water a second life. Together, we drastically reduce worldwide water consumption.

CONSUMER FRIENDLY & SUSTAINABLE

- Save water and energy
- Reduce wastewater
- Reduce carbon footprint
- No compromise on living comfort
- Hydraloop reuse water is clean, clear, safe, and disinfected
- Patented, award-winning technology
- Certified to the highest international standards
- Low energy consumption
- Compact units with stylish design
- IoT-connected
- Easy installation
- Fully automatic
- No filters to replace
- No chemicals to add
- Self-cleaning
- Low maintenance
- Low cost of ownership
- 24/7 Online performance monitoring
- Smartphone app
- Affordable

Hydraloop H300 and H600 Connection Overview

- 1 Greywater supply for water from shower bath
- 2 Condensation water supply for water from tumble dryer air conditioning heat pump H600 only
- 3 Optional inlet: washing machine (only with inlet diverter)
*one washing machine per device
- 4 Power/network connections
wifi/LAN internet connection
- 5 power supply
- 6 Backup water inlet
- 7 Wastewater outlet
connection to sewer
- 8 Dedicated pipelines for reusable water output
toilet flushing
- 9 washing machine
- 10 garden irrigation or swimming pool top-up (with auxiliary outlet)

Hydraloop Cascade Connection Overview

- 1 Greywater supply for water from shower bath hand basin
- 2 Condensation water supply for water from tumble dryer air conditioning heat pump
- 3 Lift pump
- 4 Sewer
- 5 Manifold
- 6 Overflow
- 7 Booster pump
- 8 Backup water
- 9 Dedicated pipelines for reusable water output
toilet flushing
washing machine
garden irrigation or swimming pool top-up (with auxiliary outlet)
