WHY CHOOSE MACDS?

Our summer camp curriculum incorporates STEAM learning (science, technology, engineering, arts and mathematics) into exciting, one-of-a-kind and fun experiences for your child every day! We offer a broad range of programs and 7, mini, week-long camps to pique the interest and curiosity of every child.

The founding principle of The MACDS School's curriculum is that children experience the deepest, most genuine learning when they are having fun. We have integrated this philosophy into every aspect of our summer camp to foster play-based learning opportunities both inside and outside the classroom. We've created a variety of Activities so your children can find a program they will absolutely love.
