

# OVERVIEW: How to Help Your Students Become Better Critical Thinkers

Live webinar  
Thursday, July 30, 2020

1

## Today's speakers

Susan K. Wolcott, PhD, CPA,  
CMA  
Independent Scholar  
Wolcott Lynch

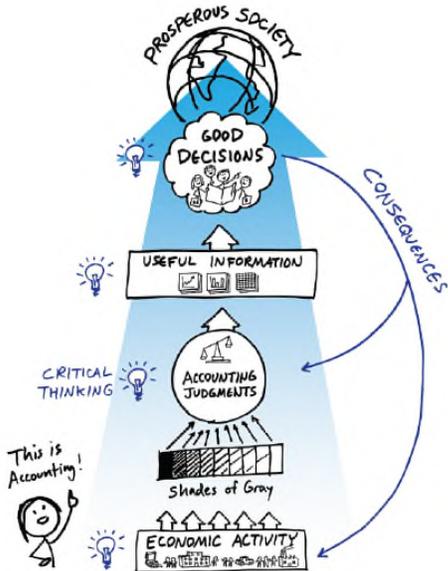

Steve Matzke  
Director, Faculty & University  
Initiatives  
AICPA

2

- Define critical thinking
- Identify common student strengths and weaknesses
- Recognize effects of student cognitive development
- Explore models and effective teaching and learning strategies
- Discussion/Questions

3

## One Way to Identify Critical Thinking Objectives: Pathways Vision Model

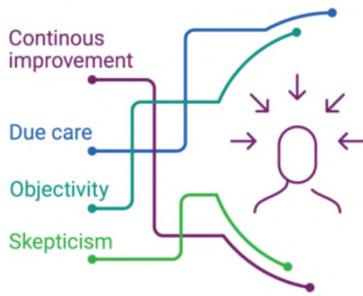

Source: <https://linktr.ee/AICPA>

4

# Critical Thinking Model

Figure 2, Guide p. 6

## Mindset

**01 Identify**

- Identify the main purpose plus embedded, subsidiary problem(s).
- Recognize open-ended/ambiguous problem(s).
- Identify relevant information for analysis (e.g., accounting knowledge, concepts, techniques, stakeholder(s) and goals/preferences).

**02 Analyze**

- Apply and interpret relevant knowledge, concepts and techniques.
- Explore potential causes, stakeholder effects and interrelationships.
- Question the quality of information and assumptions.
- Summarize pros and cons of viable alternatives.

**03 Conclude**

- Identify/develop appropriate decision criteria, and use the criteria to reach convincing conclusion(s).
- If appropriate, provide additional advice (e.g., identify implementation issues).

## Communications

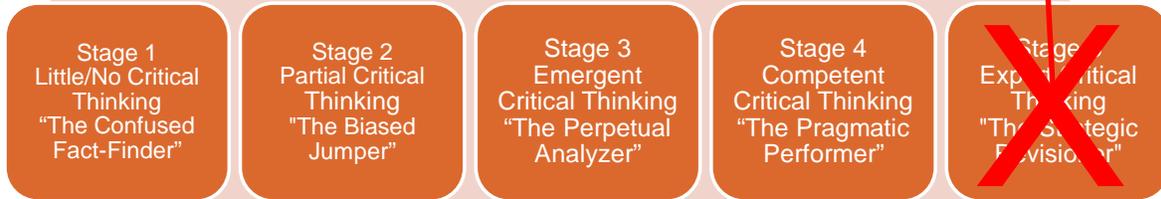

5

**QUESTION:**  
 Why Focus on  
 Cognitive  
 Development?

6

## Stages of Adult Cognitive Development Based on Students' Assumptions About Knowledge

Based on definitions, data, and concepts from King & Kitchener's reflective judgment model. The five stages shown in the diagram correspond to reflective judgment stages 3, 4, 5, 6, and 7 and omit pre-adult performance.

7

Excerpts adapted from Figure 4, Guide p. 9

## KEY Beliefs That Hinder Progress to Next Stage

- All problems are "black and white"
- The student's job is to find the correct answer as provided by experts
- Open-ended problems cannot be solved by anyone, including "experts"
- It is sufficient to generate arguments to support one's own position
- Supporting one conclusion denies the legitimacy of other valid viewpoints
- Open-ended problems can be solved tentatively and pragmatically based on available information
- No generalized principles or procedures exist for further investigation/improvement

**At Each Stage: Students will not develop higher-stage critical thinking skills until beliefs change**

8

# How Do Student Beliefs Translate Into Critical Thinking Performance?

9

Figure 20: Critical Thinking Skills Rubric for Stages 1, 2 3, and 4, Guide p. 36

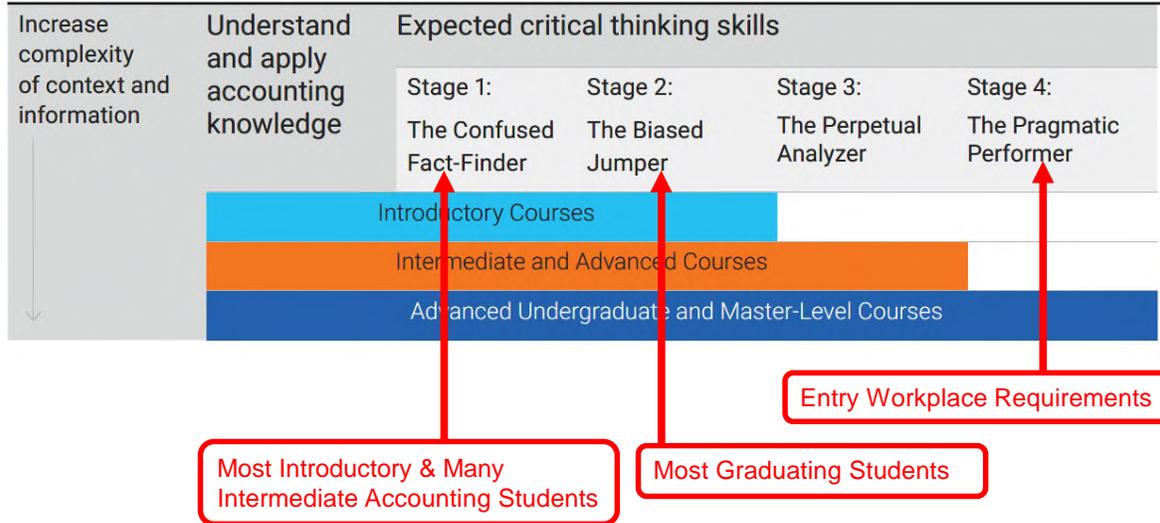

Component of Critical Thinking Model	Stage 1 Little/No Critical Thinking (Confused Fact-Finder)	Stage 2 Partial Critical Thinking (Biased Jumper)	Stage 3 Emergent Critical Thinking (Perpetual Analyzer)	Stage 4 Competent Critical Thinking (Pragmatic Performer)
Identify	<ul style="list-style-type: none"> <li>Recites purpose as given, or</li> <li>Identifies an inappropriate problem</li> </ul>	<ul style="list-style-type: none"> <li>Identifies the clearly-evident problem</li> <li>Recognizes that the problem is open-ended/ambiguous</li> </ul>	<ul style="list-style-type: none"> <li>Identifies the main purpose</li> <li>Identifies relevant stakeholders and their possible goals/preferences</li> <li>Identifies relevant accounting knowledge, concepts and techniques</li> </ul>	In addition to Stage 3: <ul style="list-style-type: none"> <li>Identifies important embedded, subsidiary problem(s)</li> </ul>
Analyze	<ul style="list-style-type: none"> <li>Applies calculations, definitions, or other "textbook" concepts</li> <li>Presents irrelevant information</li> <li>Misinterprets calculation(s) and/or concept(s)</li> </ul>	<ul style="list-style-type: none"> <li>Applies and describes the effects of relevant calculations and/or concepts</li> <li>Partially analyzes alternatives, focusing on information supporting own viewpoint</li> <li>Discounts other viewpoint(s)</li> </ul>	<ul style="list-style-type: none"> <li>Thoroughly and objectively applies and interprets relevant calculation(s) and concept(s)</li> <li>Explores causes, stakeholder effects and interrelationships</li> <li>Questions the quality of information and assumptions</li> <li>Thoroughly discusses the pros and cons of viable alternatives</li> </ul>	<ul style="list-style-type: none"> <li>Objectively analyzes the most important relevant information, implications, consequences and viewpoints</li> <li>Evaluates the quality of information and assumptions, and adapts interpretations (as needed)</li> <li>Summarizes the most important pros and cons of viable alternatives</li> </ul>
Conclude	<ul style="list-style-type: none"> <li>Instead of a conclusion, provides facts, definitions, or other "authoritative" statements</li> </ul>	<ul style="list-style-type: none"> <li>Reaches a biased conclusion that is consistent with analyses</li> </ul>	<ul style="list-style-type: none"> <li>Reaches no conclusion, or</li> <li>Provides a conclusion with little or no justification</li> </ul>	<ul style="list-style-type: none"> <li>Identifies/develops appropriate criteria, and uses the criteria to reach convincing conclusion(s)</li> <li>If appropriate, provides value-added advice (e.g., identifies implementation issues)</li> </ul>

10

Figure 18, Guide p. 31

## “Ideal” Progression vs. Typical Progression

Figure 18: “Ideal” critical thinking goals

11

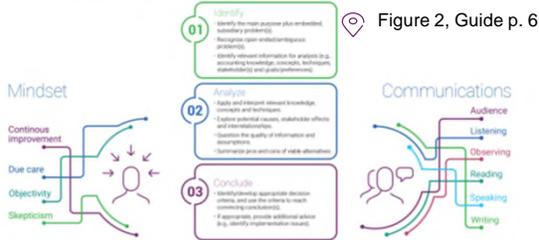

12

## Critical Thinking Model

Teach your students a critical thinking model, and use it repeatedly

### Critical Thinking Model

13

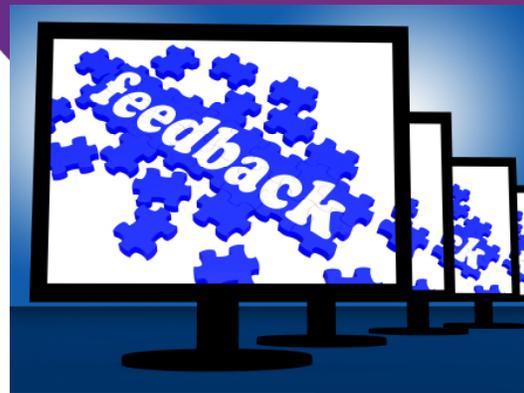

13

## Developmental Feedback

Provide students with feedback pointing to next-stage improvements (e.g., use a rubric)

Figure 20: Critical Thinking Skills Rubric for Stages 1, 2, 3, and 4, Guide p. 36

Component of Critical Thinking Model	Stage 1 Literate Critical Thinking (Confused Fact-Finder)	Stage 2 Perilous Critical Thinking (Irrated Solver)	Stage 3 Emergent Critical Thinking (Pragmatic Analyzer)	Stage 4 Competent Critical Thinking (Pragmatic Performer)
<b>Identify</b>	<ul style="list-style-type: none"> <li>Recites purpose as given, or</li> <li>Identifies an inappropriate problem</li> </ul>	<ul style="list-style-type: none"> <li>Identifies the clearly evident problem</li> <li>Recognizes that the problem is open-ended/ambiguous</li> </ul>	<ul style="list-style-type: none"> <li>Identifies the main purpose</li> <li>Identifies relevant stakeholders and their possible goals/preferences</li> <li>Identifies relevant accounting knowledge, concepts and techniques</li> </ul>	<ul style="list-style-type: none"> <li>In addition to Stage 3, identifies important embedded, secondary problem(s)</li> </ul>
<b>Analyze</b>	<ul style="list-style-type: none"> <li>Applies calculations, definitions, or other "hardcore" concepts</li> <li>Presents irrelevant information</li> <li>Misinterprets calculation(s) and/or concept(s)</li> </ul>	<ul style="list-style-type: none"> <li>Applies and describes the effects of relevant calculations and/or concepts</li> <li>Partially analyzes alternatives, focusing on information supporting own viewpoint</li> <li>Discounts other viewpoints</li> </ul>	<ul style="list-style-type: none"> <li>Thoroughly and objectively applies and interprets relevant capabilities and concepts</li> <li>Explores causes, stakeholder effects and interrelationships</li> <li>Evaluates the quality of information and assumptions</li> <li>Thoroughly discusses the pros and cons of viable alternatives</li> </ul>	<ul style="list-style-type: none"> <li>Objectively analyzes the most important relevant information, implications, consequences and viewpoints</li> <li>Evaluates the quality of information and assumptions, and adapts interpretations (as needed)</li> <li>Summarizes the most important pros and cons of viable alternatives</li> </ul>
<b>Conclude</b>	<ul style="list-style-type: none"> <li>Instead of a conclusion, provides facts, definitions, or other "authoritative" statements</li> </ul>	<ul style="list-style-type: none"> <li>Reaches a biased conclusion that is consistent with analysis</li> </ul>	<ul style="list-style-type: none"> <li>Stops at no conclusion, or</li> <li>Provides a conclusion with little or no justification</li> </ul>	<ul style="list-style-type: none"> <li>Identifies/develops appropriate criteria, and uses the criteria to reach (summarizing) conclusion(s)</li> <li>If appropriate, provides value-added advice (e.g., identifies implementation issues)</li> </ul>

# Design Your Course to Explicitly Focus on Critical Thinking

Figure 5: Course design considerations

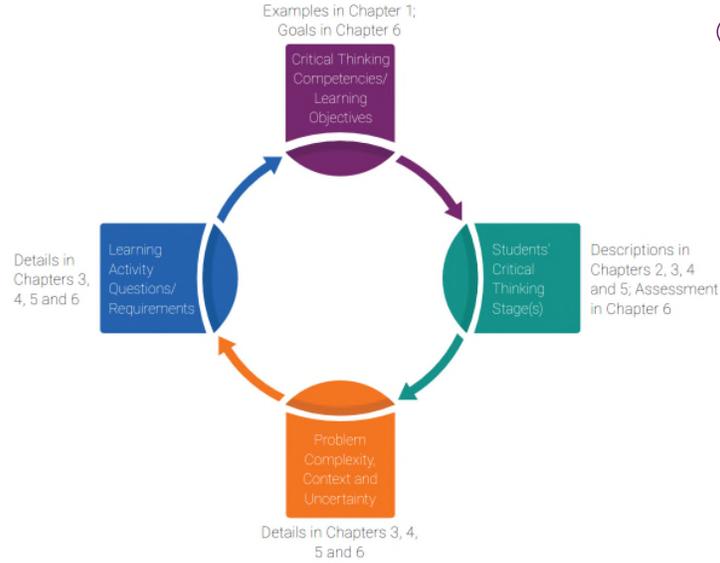

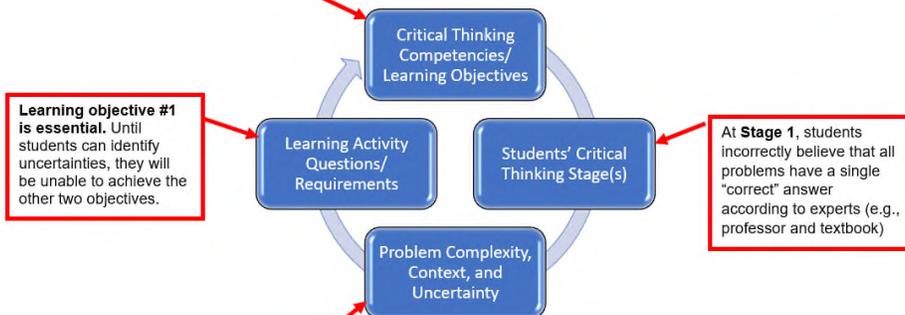

Figure 5, Guide p. 11

15

## Assignment Design Considerations for Stage 1 (Confused Fact-Finder)

**Stage 1 student should learn to:**

1. Identify existence of ambiguities/ uncertainties that prevent a single "correct" answer
2. Recognize that multiple perspectives are valid
3. Form own conclusion and support it with evidence/ arguments

**Problems should contain (Pathways Vision Model):**

- Straightforward, easily understood events and circumstances
- A few sources of uncertainty
- Few accounting judgments
- Information that is either useful or not useful (i.e., relevant or not relevant)
- Few stakeholders and uncomplicated decisions
- Few consequences and clear-cut cause and effect relationships

16

**Homework, group discussion and/or exam**

- Ask students to explain why some aspect of a situation is uncertain
- Such as:
  - Collectability of accounts receivable
  - Forecast of costs

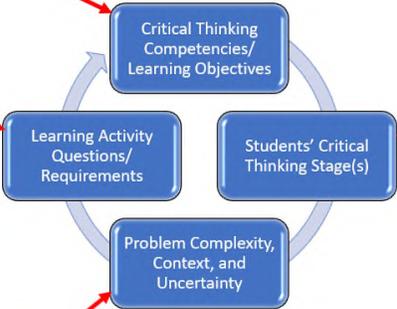

**Example for Stage 1 Students**

17

**Assignment Design Considerations for Stage 2 (Biased Jumper)**

- Stage 2 student should learn to:**
1. Delay judgment until thorough analysis is completed
  2. Identify and control biases that interfere with objective and thorough critical thinking
  3. Conduct thorough, high-quality analyses from multiple viewpoints

**Learning objective #1 is critical.** Until students delay judgment, they will continue to focus on their own biased point of view and perform only partial analyses.

**At Stage 2,** students believe that it is sufficient to stack up arguments to support one's own position

- Problems may contain (Pathways Vision Model):**
- Moderate scope and interaction of events and circumstances
  - Multiple sources and degrees of uncertainty
  - Several accounting judgments
  - Questions about the degree of information usefulness
  - Multiple stakeholders and decisions involving multiple factors
  - Some uncertain cause and effect relationships

18

### Graded homework and/or exam

- Place significant grade weight on thoroughness of analysis
- Place little grade weight on existence of conclusion

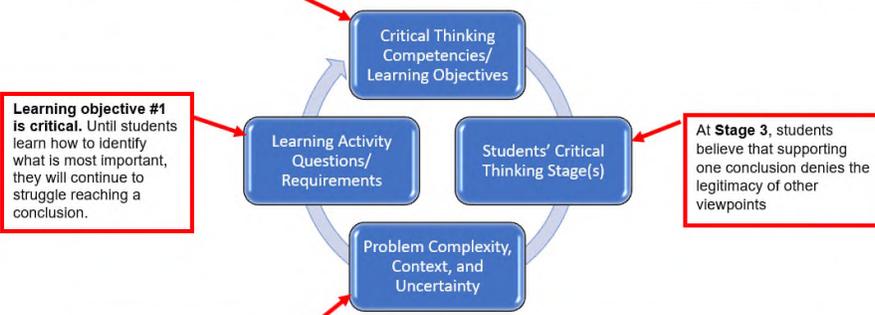

### Example for Stage 2 Students

19

### Assignment Design Considerations for Stage 3 (Perpetual Analyzer)

**Stage 3 student should learn to:**

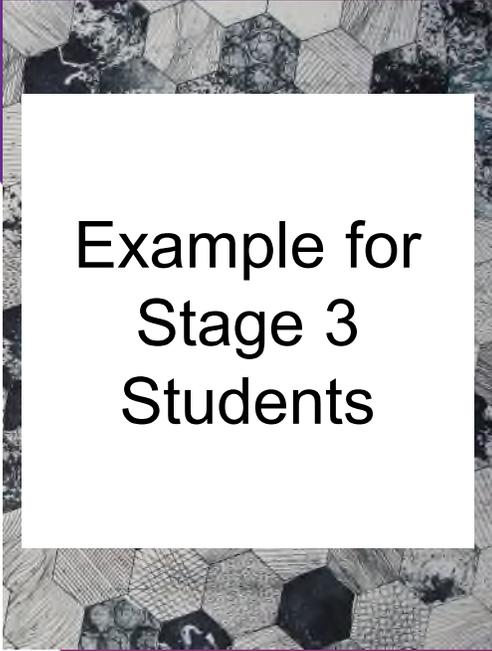

1. Focus on the most important information, stakeholders, and consequences for the situation
2. Tentatively solve complex problems in a pragmatic way using available information
3. Develop and apply decision criteria to reach a conclusion

20

Homework, group discussion, and/or exam

- Ask students to:
  - Identify the most important factors for the situation
  - Use important factors to create and apply decision criteria

Example for  
Stage 3  
Students
