<b>STANDARD CPS Hair Drug Test (Ingestion):</b>	<b>Panel: LCHAIR 5</b>
<b>EXPANDED Urine Drug Test (MedPro 30+ Drugs + Rx Meds)</b>	<b>Panel: CRL30F7</b>
<b>STANDARD CPS URINE Drug Test (LOD with Fentanyl &amp; EtG alcohol) Panel:</b>	<b>Panel: CRL 366X</b>
<b>D.N.A. Paternity Swab Testing-Trio (Includes up to 3 Donors)</b>	<b>Panel: DNATrio</b>
<b>ORAL FLUID Drug Testing (Lab Based-Standard Cut-offs)</b>	<b>Panel: LCOral 5</b>
<b>BREATH ALCOHOL Testing (Evidential Breath Test, with print-out)</b>	<b>Panel: BAT</b>
<b>EXPOSURE ONLY Hair Drug Testing "ChildGuard 5 Drugs"</b>	<b>Panel: USDTL 5</b>
<b>HAIR/NAIL Drug Testing - 7 Drugs (Tests for drug Ingestion &amp; exposure)</b>	<b>Panel: USDTL 7</b>
<b>HAIR/NAIL Drug Testing - 9 Drugs (Tests for drug Ingestion &amp; exposure)</b>	<b>Panel: USDTL9</b>
<b>HAIR/NAIL Drug Testing - 10 Drugs (Tests for drug Ingestion &amp; exposure)</b>	<b>Panel: USDTL 10</b>
<b>HAIR/NAIL Drug Testing - 12 Drugs (Tests for drug Ingestion &amp; exposure)</b>	<b>Panel: USDTL 12</b>
<b>EtG ALCOHOL via HAIR</b>	<b>Panel: USDTLetg</b>

**DIRECTIVE**

Imperial County Department of Social Services-Children & Family Services is directing FDTS, Inc. to directly observe sample collection, process and arrange for drug and/or alcohol testing of the above Donor sample(s), then report these results direct to the Imperial County Department of Social Services-Children & Family Services. The above Social Worker or S.W. Assistant has verified that the Donor's presented to FDTS, Inc. staff are the person(s) whom testing is requested from and relieves FDTS, Inc. from obtaining picture identification from each Donor. The above agency has full authority, under California Law, to legally request such tests on adults and under age children, with or without the consent of the child's legal guardian or parent(s). It is further understand that the I.C.S.S. Social Worker assigned to this case is fully responsible for obtaining a written "Service Plan" needed to process payment for this order.

**SOCIAL WORKER AGREES TO ENSURE PAYMENT TO FDTS, Inc., WITHIN 30 DAYS OF SERVICE.**

**Social Worker's Signature**

**10 Panel:** \$ 415.00    **12 Panel:** \$ 449.00    EXPANDED & CUSTOMIZED PANELS AVAILABLE (See Below).

When a child or someone under guardianship is exposed to illegal substance abuse they often also face other coexisting obstacles to a normal life - neglect, abuse, violence, and other vulnerabilities. Substance abuse is a disease, one that often prevents adults from doing what is in a child's best interest. Detecting these dangerous environments is paramount to keeping the child safe. Testing with ChildGuard® can assist, where other exposure drug tests fall short.

ChildGuard® is the only drug test designed to detect passive exposure to drugs, distinguishing between both native drugs and drug metabolites in hair specimens. Drug metabolites are produced in the body only if drugs have been ingested. Children in drug exposed environments are most often not drug users themselves, so drug metabolites are typically absent when a child is being tested for drug exposure. Typical hair tests with other labs will only report a positive exposure result if drug metabolites are detected, even when the native drug is in the child's hair specimen. ChildGuard® reports a positive result if either native drugs or drug metabolites are detected, giving much better insight about the child's environment. ChildGuard® can provide evidence of substance use in a child's environment for the past 3 months, and can be performed on donors of any age.

A positive ChildGuard® test result suggests that the donor has experienced one or more of the following: Contact with drug smoke, contact with sweat or sebum (skin oil) of a drug user, contact with the actual drug, or accidental or intentional ingestion of the drug(s).

Specimen collection for ChildGuard requires the same collection materials as standard hair testing.
