

*The Responsible AI Learning Model for
Schools, Colleges, and Universities*

INTRODUCING The Burkette AI Governance Framework

Think · Learn · Verify

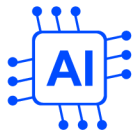

Christine Burkette

Technology Executive | AI Governance Strategist
Creator of The Burkette AI Governance Framework

The Challenge Facing Education

Students are already using artificial intelligence across disciplines, while many institutions are still developing policies and guidance. This growing difference between student AI usage and institutional readiness is creating what can be described as the AI Education Gap.

The Burkette AI Governance Framework helps institutions close that gap.

AI Governance

Establish clear policies defining responsible AI use, transparency requirements, and academic integrity guidelines for students and faculty.

Faculty AI Readiness

Equip educators with the knowledge and tools needed to understand AI technologies, redesign assignments, and guide responsible AI use.

Student AI Literacy

Teach students how artificial intelligence works, how to verify AI-generated information, and how to use AI as a learning tool rather than a shortcut.

Learning Verification

Implement mechanisms that confirm students truly understand the material through project demonstrations, oral defense of ideas, and AI disclosure statements.

Why This Framework Matters:

Maintains Academic Integrity

Ensures students demonstrate real knowledge while using AI responsibly.

Prepares Students for AI-Driven Careers

Builds AI literacy and critical thinking skills needed in the modern workforce.

Modernizes Learning Models

Helps schools evolve teaching practices to match the scale of technological change.

Problem We Are Solving:

- Artificial intelligence is transforming how students research, write, code, design, and solve problems.
- Yet many schools and universities are struggling to balance innovation with academic integrity.

The Burkette AI Governance Framework: Think · Learn · Verify provides a structured model for integrating AI into education while preserving critical thinking and meaningful learning outcomes.

**Bring The Burkette AI
Governance Framework
to Your Institution**

Christine Burkette offers:

- Keynote presentations
- Faculty workshops
- Institutional pilot programs to help schools and universities integrate AI responsibly.
