The Appetite Spectrum: Making Financial Crime Risk Actionable

Dr. Bina Lehmann, Director, Financial Crime Risk / KYC & EU AML, Corporate & Investment Bank, Deutsche Bank

Have you defined your institution's appetite for money laundering risk? Too often, organisations shy away from articulating a positive appetite for financial crime or compliance risk. This interactive keynote challenges binary "yes/no" thinking and explores risk on a spectrum, connecting appetite and assessment to show where risk truly sits against tolerance.

The session tackles the myth of "zero appetite for financial crime risk" by acknowledging the reality of residual risk from imperfect controls. With a flood of metrics in play, the focus is on clarity and impact, cutting through the noise to surface bold insights and decisive action.
