Dear Sir:-

There is some talk of the Mayor, Park Commissioners, and myself making a trip through some of the Western cities for the purpose of inspecting parks, and park-way systems. We may plan to be gone three weeks. When we have decided what cities to visit we shall notify them, so that our time may be spent to the best advantage.

You will do me a personal favor by suggesting those cities which afford the best opportunities for information along the lines we seek. Knowing that you are thoroughly conversant with the details in all the cities of the country, it will be but a matter of a few moments time to send us the information, and hence I have been bold to ask it.

Assuring you that I am looking forward to the time when we shall be associated together in the work in this City, I am

Yours very respectfully,

*F. Herbert Snow*  
City Engineer. *R.*

(Dictated by F. H. S.)
