Post punk trio, BREAK TO BROKEN have announced their second full-length record, The Hope Experiment.

The band features Australian musician Clinton Maher and New Jersey punk scene veterans Eli Nowak and Justin Rauschkolb. Formed when the world shut down in 2020, the group worked across continents and time zones to become a fully functioning band.

Despite their remote collaborative process, Break to Broken have effectively created their most cohesive and sonically expansive record to date. The Hope Experiment is the sound of a borderless band that has truly locked into its groove, showcasing 12 songs that explore new territories while remaining anchored in the raw, driving post-punk sound the band is known for.

Built upon their mutual love for the 90's Dischord Records music and DIY ethic, they continue to push the boundaries of what a band can be, connected by creativity rather than geography.
