

FALL 2024

SPRINGS
DIGITAL

LOCATED IN ROCK HILL, SC

Revamping one of the most iconic buildings in the region, the Thread transforms 400,000 square feet of historic industrial warehouse space into an exciting adaptive mixed-use development.

- DERICK CLOSE

THE SUSTAINABLE CHOICE

DIGITAL PRINT

WATER USE

reduces water consumption by 70%

ENERGY USE

reduces total energy consumption by 51%

GREENHOUSE GAS IMPACT

generates 46.5% less carbon dioxide emissions per square meter

OTHER ENVIRONMENTAL FACTORS

requires less floor space than digital reactive printing for the same amount of printed fabric

outdoor and performance fabrics

In an effort to manufacture the best digitally printed textiles in the industry and minimize our impact on the environment, we launched Springshield 2.0, our PFAs-free soil and stain performance outdoor finish.

When combined with latex printing, our substrates reach a lightfastness of over 1,000 hours.

Springs Mills

Alicia Messina

The Baxter Mill Archive is the largest of its kind in the industry. The collection includes over a million antique documents, hand-painted designs and vintage art books, spanning over three or more centuries from nearly every corner of the world.

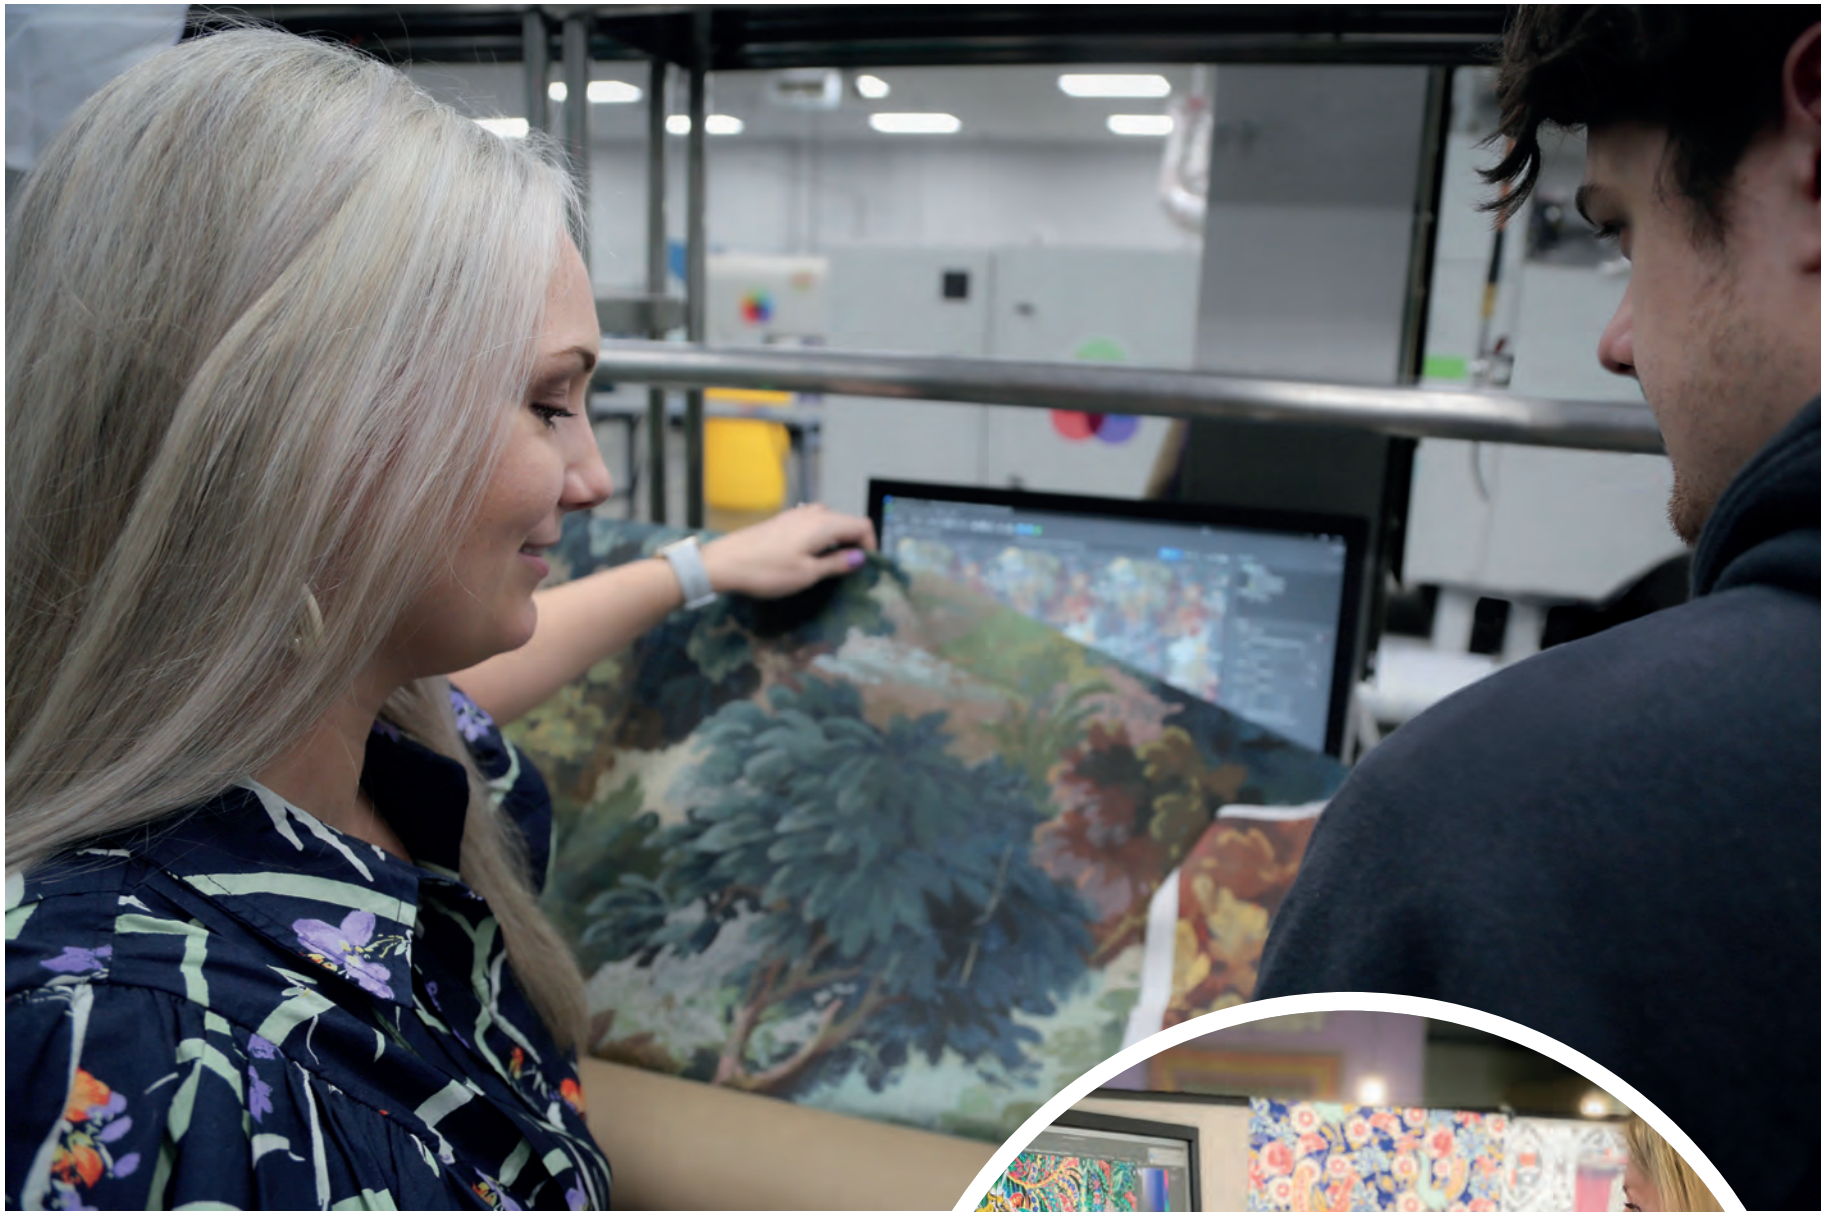

Ilene Danchig

Frank Cassata

CREATIVE SERVICES

SERVICES INCLUDE:

- CAD design
- Art customization
- Product development
- Trend & marketing services
- Digital printing
- Color matching

Our in-house design team, in partnership with the Baxter Mill Archive, identifies designs based on specific targeted lifestyles, trends and seasons.

The process starts by discussing the final product, from substrate selection and choosing the best digital print method for the project, to finding the perfect archive for inspiration. The team then scans in the archive, or creates the original art, to meet digital print specifications. Once the art is finalized, the file is then ready to print.

WALLPAPER

With five wallcovering substrates for commercial and residential use, we can help you transform your ideas and develop a fully customized product.

OUR ECO-FRIENDLY WALLCOVERINGS INCLUDE:

SISAL GRASSCLOTH made of PVC-free sisal grass fibers and ideal for moisture free residential use

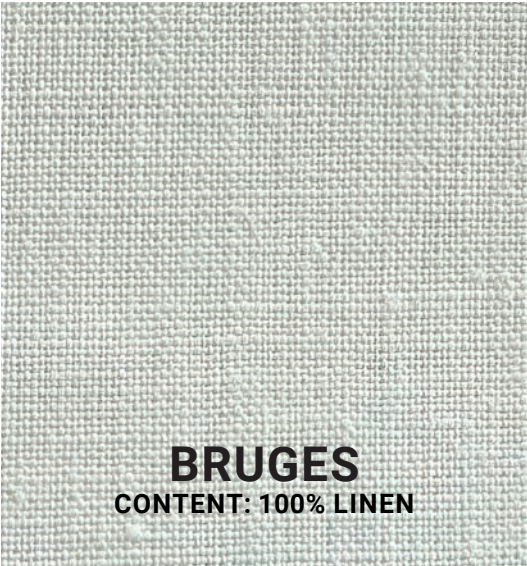

FAUX LINEN COMMERCIAL TYPE II phthalate-free linen texture formulation for commercial and high-traffic residential use

PVC-FREE HEAVY DUTY TYPE II wood pulp fiber with a matte finish for commercial and high-traffic residential use

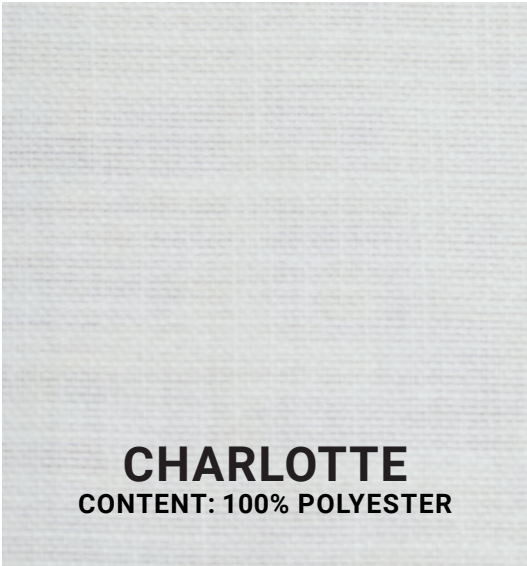

SHIMMERY PEARL MICA PVC-free substrate with a metallic mica coating for moisture free residential use

LUXURY SMOOTH PVC-free wood pulp/natural fiber substrate with a smooth matte finish for commercial and residential use

FABRIC

WIDTH: 60" **PRINTABLE WIDTH:** 58"
WEIGHT: 6.75 OZ/YD² (229 GSM)
ABRASION: GRADE 3 @ 30,000+ WYZENBEEK
CROCKING: 4 - DRY; 3 - WET
