SPRINGS COTTON MILLS

Springs Cotton Mills was founded by Leroy Springs and Samuel Elliot White in Lancaster, South Carolina.

RETAIL AND SPECIALTY FABRIC DIVISION FOUNDED

Springs Industries established the Retail and Specialty Fabrics Division to oversee the production of high-quality apparel and finished fabrics.

1970

2001

CREATIVE PRODUCTS GROUP

Under the leadership of Derick Close, whose family founded Springs, the Retail and Specialty Fabrics Division was renamed the Creative Products Group.

SPRINGS CREATIVE PRODUCTS GROUP, LLC

Recognizing the Creative Products Group's potential for growth and proven ability to operate independent of the corporate structure, Derick Close purchased the division in March 2007.

2007

2013

DIGITAL TEXTILE PRINTING

Springs Creative invested in the company's first domestic digital textile printing resources. The result was dramatically increased speed to market with unparalleled color and detail print quality advancements.

SPRINGS DIGITAL

To maximize the division's potential, Springs Digital split from Springs Creative. The company sits at the forefront of the decorative home textiles market and the future of the digital textile printing industry.

2024

TEXTILES REIMAGINED

At Springs Digital, we offer a unique combination of services to suit all your design and digital print needs. All our current substrates are designed and selected with both you- and the environment- in mind. Customers always have the option of providing their own fabrics.

Our digital printing facility is equipped with the very latest textile printing technology, providing significant advantages for our customers. We offer 3 printing methods: dye sublimation, pigment, and latex.

We also offer product development, color matching, and in-house artwork editing/creation.

HIGH PRINT RESOLUTION

LIMITLESS COLORS

SUSTAINABLE

CLEAN AND DRY PROCESS
NO WATER WASTE

NO SCREENS OR CYLINDER COST

LOW MINIMUM ORDER QUANTITIES

NO RESTRAINTS ON REPEATS

PRINTED IN THE USA

THE SPRINGS COLLECTION

The Springs name has been associated with textile manufacturing since its first mill opened in 1887. Springs Archive Collection is home to the original designs of iconic brands such as Wamsutta and Springmaid with over 200,000 timeless and classic motifs.

THE ILENE DANCHIG TEXTILE COLLECTION

Ilene Danchig began her career in the textile industry as a designer and weaver. Her passion for collecting textiles has led her to amass more than 100,000 textiles and prints from all over the world. Danchig soon realized she could sell her unique textiles and art as an inspiration to the fashion and home furnishing industries.

BAXTER MILL *archive*

The Baxter Mill Archive is the largest of its kind in the industry. The collection includes over a million antique documents, hand-painted designs and vintage art books, spanning over three or more centuries from nearly every corner of the world.

STUDIO MESSINA

The Messina Archive represents nearly three decades of collecting. It was amassed from a variety of sources including auction houses in Paris and London, antique shows, textile dealers, private collectors, estate sales and flea markets across the country and overseas.

THE FRANK CASSATA TEXTILE COLLECTION

The Frank Cassata Archive library is a blend of one-of-a-kind apparel, home decorative, traditional and modern archives. The collection also houses more than 700 wallpaper and fabric swatch books.

Our in-house design team, in partnership with the Baxter Mill Archive, identifies designs based on specific targeted lifestyles, trends and seasons. Services include CAD design, art customization, product development, trend and marketing services, digital printing, and color matching.

CREATIVE SERVICES

The process starts by discussing the final product, from substrate selection and choosing the best digital print method for the project, to finding the perfect archive for inspiration. The team then scans in the archive, or creates the original art, to meet digital print specifications.

Once the art is finalized, the file is then ready to print.

PERFORMANCE FABRICS

In an effort to manufacture the best digitally printed textiles in the industry and minimize our impact on the environment, we launched Springshield 2.0, our PFAs-free soil and stain performance outdoor finish.

When combined with latex printing, our substrates reach a lightfastness of over 1,000 hours.

TESTING LAB

Springs Digital operates a full featured testing lab in Fort Lawn, SC. Our facility conducts all the needed testing to provide COAs (Certificates of Analysis). We measure strength, elongation, shrinkage, thickness, air permeability, weight, abrasion, and thread count. Our lab also tests to reach various fire retardancy standards, colorfastness, accelerated laundering, and other common textile standards.

We pride ourselves on quick turnaround time and offer testing services to outside parties.

SPRINGS CREATIVITY

THE NEW HOME OF SPRINGS DIGITAL

The Thread will be a creative destination for the community to come together to work, eat, shop and play. The Thread is spooling up in the Knowledge Park district of Rock Hill. This will be the state's largest adaptive reuse project. This project, along with others, is poised to create the most dynamic and innovative city submarket in the greater Charlotte metro area.

Located in one of the most iconic buildings in the region, The Thread transforms 400,000 square feet of historic industrial warehouse space into an exciting adaptive mixed-use development.

GLOBAL FOOTPRINT

Springs Digital Shanghai is our primary global sourcing arm. Our office not only facilitates shipments to countries other than the U.S. as needed by our customers, but their sourcing capabilities cover all areas of our company— from printed cotton fabrics to upholstery and spacer products.

Members of our executive team visit China multiple times per

year to have one-on-one contact with team members, visit with strategic suppliers, and follow up on orders.

We are actively working with factories in the following countries: China, India, Pakistan, Turkey, South Korea, Thailand, Taiwan, and the United States. All our factories are audited for social compliance by third party auditing companies.
