

WALLPAPER

At Springs Creative, our goal is to help you envision a customized wallpaper program. We can help you transform your ideas and develop a fully customized product from design, roll-size, quantities and even provide blind, drop-shipping to your customer.

1 Custom Designs

Springs Creative is a full-service design company and manufacturer that transforms customer art and designs into wallcoverings for residential or contract applications.

2 Baxter Mill Archive

Customers have access to Springs Creative's Baxter Mill Archive, one of the largest privately held textile archives in the US. With more than 600,000 artworks to choose from, we invite you to "enter the vault" and find designs for your brand.

3 Coordinating Fabrics

As a leading digital textile printer, we can create coordinating residential and contract grade indoor and outdoor fabrics.

4 Low MOQs

We will work with you to provide low MOQs and offer customized roll sizes.

5 Range of Materials

We offer a wide range of in-stock and special order substrates for both residential and commercial applications.

6 Quick Leadtimes

Because we print in South Carolina, we offer fast lead times, generally 2-3 weeks.

WALLCOVERING MATERIALS

COATED PAPER A traditional, matte, coated paper. Paper wallcoverings utilize the paste-the-paper method. Traditional papers can be wiped clean and are fairly easy to remove from walls.

Springs Creative Material: Papel

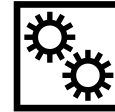

spongeable

paper

peelable

excellent
color fastness

NONWOVEN These substrates are composed of cellulose and recycled polyester fibers. Nonwovens have gained popularity over traditional wallpapers because of their performance attributes. Easy to install, non-wovens use the paste-the-wall method, also making it easier to remove. They can be used in humid areas and are less prone to mold and mildew.

Springs Creative Material: Primo (residential), Parchment (residential), and Command (commercial type II)
