

The re-designed

 **UP COUNTRY**

So.. whats new

We've made significant upgrades to the UpCountry lineup—both inside and out—designed to enhance retail appeal, functionality, and overall customer satisfaction.

On the interior, all UpCountry models now feature durable marine-grade PVC woven flooring, expanded cabinetry and overhead storage with updated color options, and a seamless one-piece galley countertop with integrated sink and cover to maximize usable prep space. A sleek glass-top range adds a modern touch, while passthrough windows improve airflow and openness, an additional 3 inches of ceiling height and a lower profile a/c-heat pump interior unit give additional height.

We've also added key convenience and comfort features your customers will appreciate, including generator prep, a bathroom skylight for increased headroom and natural light, Intellitec Battery Guard protection, bedside reading lights, upgraded cushions, and an available TV with mounting bracket.

On the exterior, the updates continue with a clean white finish on XS models, refreshed graphics, and new optional side and rear awnings to expand outdoor living space. We've also upgraded to more robust jacks for added stability, included a rooftop access ladder, relocated the low point drain to the rear wall for improved usability and serviceability and a generator with mount are optional on all models.

These enhancements are designed to make the UpCountry series more competitive on the lot and more compelling to today's truck camper buyer—delivering a strong combination of modern design, practical features, and real-world usability.
