

Cervical cancer is a significant health concern globally, and Karnataka, including rural and tribal areas are no exception.

Despite being preventable, Cervical cancer remains a leading cause of cancer-related deaths among women in India.

This project aims to address this issue by conducting an Extensive Awareness Campaigns targeted at women aged 18-55 in all Districts of Karnataka, 1st Phase: 10 districts of Karnataka.

The campaign will focus on Educating Women about Cervical Cancer, its Prevention, Early Detection, o provide Free Screening and Health Checkup for the underprivileged community and Providing Support for Handling Mental Trauma of the patient and family.
