

## High Mortality Rate due to Cervical Cancer

Cervical cancer is one of the leading causes of **Cancer-related Deaths among women globally**, including in Karnataka. Many women are diagnosed at Advanced stages when Treatment options are limited and Prognosis is poor.

Early Detection through Screening can lead to Better Outcomes and Higher Survival Rates.

## Lack of Knowledge about Cervical Cancer

There is often a Lack of Awareness and Knowledge about Cervical Cancer, it's risk factors and preventive measures, particularly in Underserved Communities.

Many women may not understand the Importance of Regular Screenings or may not have access to Healthcare Services for Early Detection.
