

Strata Collection

Conestoga's Strata TTS collection features 23 colors in a variety of textures ranging from deep linear patterns to embossed grains that align perfectly with cathedrals and other characteristics within the grain. These highly durable thermally textured surfaces (TTS) provide lifelike depth in both look and feel - the most realistic textured products in the industry.

*Textured cabinet doors
& drawer fronts in sleek
contemporary designs*

Sequential Grain Match

Non-Sequenced Grain

- This is our standard method of production.
- Each door and drawer front will have its own random grain pattern.
- Vertical and Horizontal grain orientation is available with no upcharge.

Sequential Grain Match (Slab design only – upcharge applies)

- The Sequential Grain Matching option is available on TTS Slab doors and drawer fronts.
- Vertical and Horizontal grain orientation is available.
- Sequence matching will flow through all associated parts within individual cabinets. Graining will not be sequenced from cabinet to cabinet.
- The maximum cabinet size for the Sequence Grain Match option is 79" x 96" vertical grain, or 96" x 79" horizontal grain.
- Sequence Grain Matching templates are available to quickly and easily order sequenced matched products. These templates identify the position and sequence of the doors and drawer fronts within each cabinet. Contact your Sales or Customer Service Representative.

Complementary Products

Stainless steel edgeband available with all colors.

Rolls of matching edgeband in all TTS colors as well as stainless steel.

TTS veneers available in all colors (texture differs from doors).

Hand pull in natural aluminum and polished chrome.

- Available in Slab, Three-Piece and Five-Piece construction, door and drawer front designs can be mixed to achieve a variety of looks and price points.
- Significant cost savings compared to finished wood components.
- Shorter lead-times and no finishing allow you to ship complete kitchens sooner, improving your output and cash flow.
- Highly durable TTS materials are resistant to scratches, dents and fingerprints.
- TTS products offer a high level of stability that withstand warping and bowing, even in high humidity or arid environments.
- Made with sustainable materials including wood chips, fiber and recycled wood makes the collection an environmentally friendly choice.
