

Vogue Collection

The Conestoga **Vogue** Thermally Textured Surfaces program brings true beauty, high durability, and super practicality to a wide variety of spaces – residential kitchens and baths, retail and commercial settings, institutional environments including schools, medical facilities, and more. Vogue offers the same realistic wood look and durability as our Strata products but with a less aggressive embossed grain texture. Vogue TTS gives new meaning to broad ranging, practical design flexibility...at a very appealing price point.

*Looks like wood.
Feels like wood.
Wears like iron.*

- Available in slab, three-piece, and five-piece door and drawer front designs.
- Extensive color palette to appeal to a wide variety of tastes and styles.
- Subtle grain textures that gives designers options to create the precise style they're looking for.
- Antibacterial surface treatment on the door's face and back make Vogue a smart choice for virtually any environment.
- High quality and excellent durability at a highly attractive price point.
