

**BUCKLEY  
FENCE**

A WHOLE NEW BREED OF FENCE

Buy it once and *never replace it again.*

THIS FENCE IS MADE OF STEEL.

**WHEN IS A FENCE NOT JUST A FENCE?**

When it buys your life back.

With a wood fence, on average, you spend time replacing 5,000+ nails and screws and 2-5% of fence rails due to naturally-occurring cracks and splinters every year.

In damp climates, PVC fences have to be deep-cleaned at least once a year because of mold. In bright, dry climates, they build up a chalky layer from UV light that comes off when touched & needs repainting.

Welded pipe fences are impossible to thoroughly clean, leaving you to repaint weld joints and pipes every year due to rusting, lifting, and bleeding.

That's a lot of your time, money, and worry down the drain, every year. And, even after all of that, you still have to fully replace wood and PVC fences every 7-15 years.

**Or, you could buy a Buckley Steel Board Fence once and forget about it.**

# Premium Horse Fence

**3-Rail**  
**4-Rail**

## ELEGANT

Our Steel Board Fence is the only post and rail board fence made of steel. It has the aesthetic appeal of traditional wood fencing but is much stronger and more durable.

## LONG-LASTING

The lifetime expectancy of our Steel Board Fence is decades and the lifetime maintenance costs are virtually zero, making it the most innovative & durable fence available today.

## SAFE

If a stampeding horse causes the rails to bend, the fence will buckle and release from the posts with no breakage or splinters, preventing serious injury to the horse, unlike other options.
