# Safe-Hit® Glarescreen

The Safe-Hit® Glarescreen is a reboundable vertical blade delineator system that is used to delineate both temporary and permanent medians and block out headlight glare of oncoming traffic.

Positioned on the top of median barriers, this system helps to minimize traffic slowdowns in work zone areas. Made of polymeric materials, the blades are flexible and durable, and can take multiple high speed impacts and return to vertical. The blade fits into a plastic base and base rail system. The entire system mounts to the top of median barriers or guardrail to create a shield for the length of the median. Reflective sheeting may be added to the blades.

# REBOUNDABLE BLADE

## Features

- Blocks out headlight glare.
- Serves as a delineator, providing greater visibility and creates a clear navigation channel.
- Reboundable and durable! Able to withstand multiple impacts from overhanging loads.
- Reduces traffic jams in work zones by limiting cross-median visibility.
- Extremely versatile – modular design adapts to most sizes of barrier, temporary or permanent.
- Fast and easy installation and replacement.
- Allows easy access to both sides of highway for maintenance or emergency crews.
- Easy to maintain and repair if needed.
- Ideally suited for construction work zones.
- Minimal debris when impacted, unlike fencing or plywood products.
- Available in green, orange and white (custom colors available).
- 18" (457 mm), 24" (610 mm) and 30" (762 mm) standard height.
- Compact storage and shipping means more feet per delivered load.

## Specifications

- Green, orange & white
- 9" x 18", 9" x 24" or 9" x 30"
- High-impact Polymer With Radius Corners

### Mounting Base

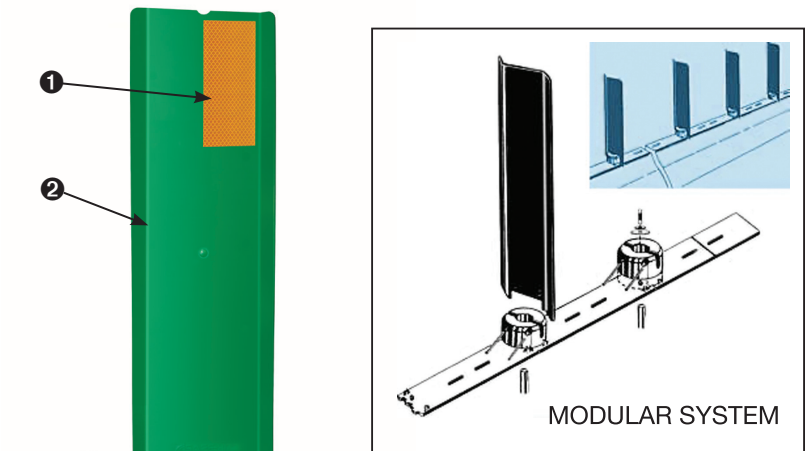

- 4-3/4" Diameter x 1-7/8" Tall
- Black High-impact Polymer

### Full Base Rail Section

- 5-1/2" x 24" x 5/8"
- White High-impact Polymer

### Half Base Rail Section

- 5-1/2" x 11" x 5/8"
- White High-impact Polymer

- ① Retroreflective Sheeting (Optional)
- ② Flexible, High-Impact Polymer Blade (18", 24" or 30" tall)
- ③ Zinc Plated, Galvanized or Stainless Steel Hardware
- ④ Black High-Impact Mounting Base
- ⑤ 24" and 11" Modular Base Rail Sections
