# BarrierGate®

The BarrierGate® is an automated gate for barrier openings that may be used to restrict unauthorized access and help eliminate barrier ends in median openings. It is NCHRP Report 350 Test Level 3 and Test Level 4 compliant. The BarrierGate is ideal for a variety of applications including median crossovers, HOV lanes, and reversible lanes.

## Assembly and Maintenance

- Automated models open/close in one minute.
- Security coded keypads allow authorized personnel to gain access from either direction.

# PROVIDE EMERGENCY ACCESS

## Features

- Automated or manual models available.
- Generous opening size of 42 feet.
- Provides convenient, secure median cross-over access.
- Helps to prevent illegal U-turns.
- Helps to improve emergency response time.
- Ideal for rerouting traffic.
- Provides convenient access to authorized personnel.

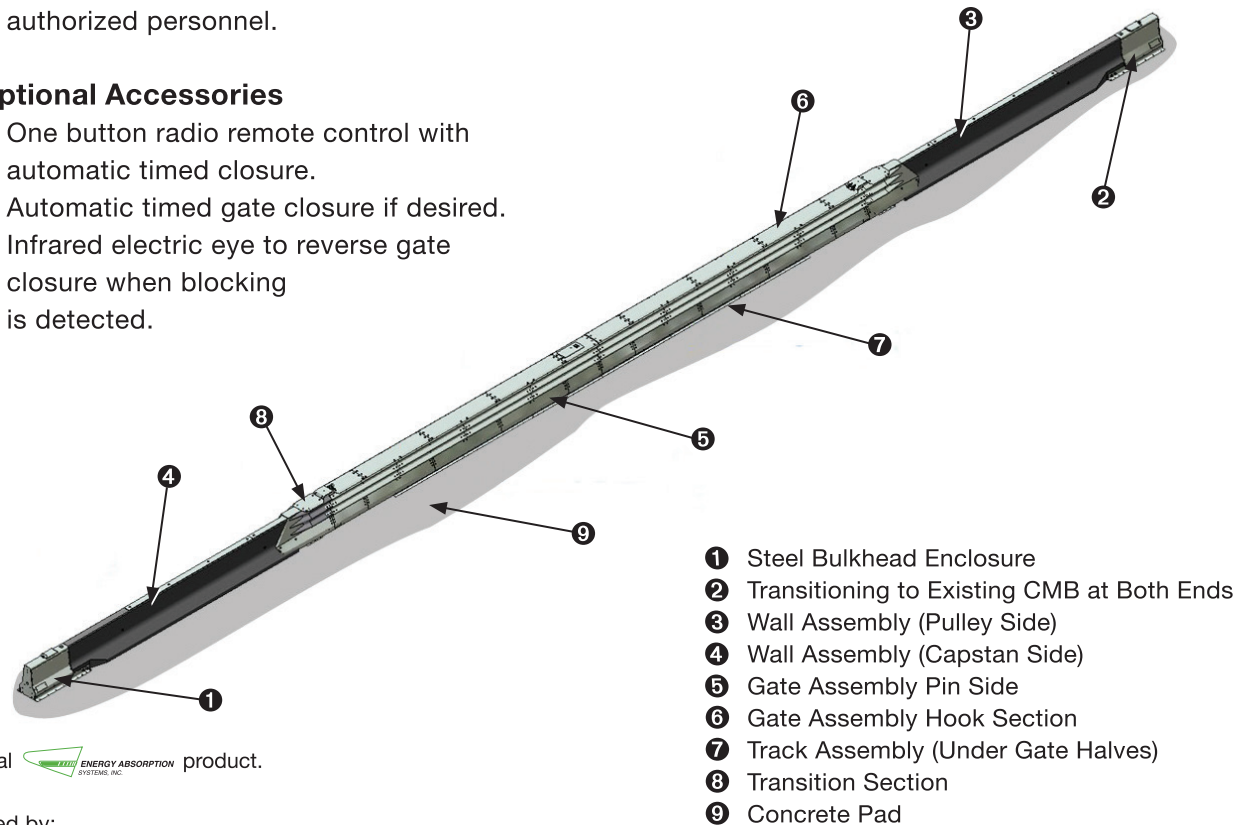

## Optional Accessories

- One button radio remote control with automatic timed closure.
- Automatic timed gate closure if desired.
- Infrared electric eye to reverse gate closure when blocking is detected.
