

# THE SENTINEL™ DAD

MODEL: TRAILER-MOUNTED

## CONTROL WORK ZONE TRAFFIC FROM DRIVEWAYS AND LOCAL STREETS

The Sentinel™ Driveway Assistance Device (DAD) is designed to alert drivers of the traffic direction before they enter a one-lane two-way road in temporary work zones from driveways or local streets. The signal head consists of one 12" diameter Red circular LED indication with two 8" diameter red arrow LED indications mounted on each side. Directional signage can be attached to provide clear instructions to motorists.

## IMPROVES SAFETY AND TRAFFIC FLOW

The Sentinel DAD system helps eliminate driver confusion when entering work zones from a driveway or local street. It improves safety for motorists and workers – all while eliminating traffic queue build up.

Sentinel shown with optional solar.

MADE IN USA

## EASY TO TRANSPORT, SETUP AND OPERATE

The Sentinel Trailer-Mounted DAD system offers traffic control functionality in a compact, towable system. It has a self-contained battery power supply with optional solar recharging. The Sentinel DAD system is designed with a small footprint and can be easily towed and positioned even in tight work zone areas. The easy-to-use Galaxy® DAD Operating System provides both directional and full phase operation via sensed controls.

## INTERCHANGEABLE DESIGN

The Sentinel Trailer-Mounted DAD system is part of the Sentinel family, which include a range of interchangeable components that can be mixed and matched to expand your fleet. The Sentinel can be configured in a variety of ways, including portable traffic signals, automated flagger assistance devices (AFAD), driveway assistance devices (DAD), pedestrian signals and more.

## SENTINEL FEATURES

- » Easy to tow and deploy
- » Compact trailer – small footprint
- » Modular mast with universal mounting plates
- » Standard bank of 2 batteries
- » Optional additional batteries for extended life
- » Optional solar recharging
- » Easy-to-use Galaxy® DAD Controller
- » 24/7 real-time remote monitoring

## SPECIFICATIONS

- » Height to Bottom of DAD Signal Head 9'
- » Overall Height (stowed) 6' 4"
- » Overall Width (at tires) 4' 3"
- » Overall Length 7' 10"
- » Weight (no solar) 700 lbs.
- » Weight (with solar) 730 lbs.
  - One 12" diameter red circular LED light
  - Two 8" diameter red arrow LED lights

## EASY TO TRANSPORT AND MOVE ON ANY SURFACE

The Sentinel DAD system with wheeled base is designed with a small footprint and can be easily moved using its ergonomic wheeled base that is designed to move and swivel with minimal effort – on virtually any surface, including gravel. The system features a self-contained power supply with a rechargeable bank of two batteries and an optional solar charging system. The Galaxy® DAD operating system provides both directional and full phase operation via sensed controls.

## INTERCHANGEABLE DESIGN

The Sentinel DAD system with wheeled base is part of the Sentinel family, which include a range of interchangeable components that can be mixed and matched to expand your fleet. The Sentinel can be configured in a variety of ways, including portable traffic signals, automated flagger assistance devices (AFAD), driveway assistance devices (DAD), pedestrian signals and more.

## SENTINEL FEATURES

- » Small footprint
- » Modular mast with universal mounting plates
- » Easy to move and swivel – even on gravel
- » Adjustable push/pull handle (stowable)
- » Can tilt and push like a two-wheel cart
- » Easy load/transport design
- » Optional electric-assist motor for movement
- » Standard bank of two batteries
- » Optional additional batteries for extended life
- » Optional solar recharging
- » Easy-to-use Galaxy DAD Controller
- » 24/7 real-time remote monitoring

## SPECIFICATIONS

- » Height to Bottom of DAD Signal Head 9'
- » Overall Height (stowed) 5' 9.5"
- » Overall Width (at tires) 2'6"
- » Overall Length 4' 1"
- » Weight (no solar) 380 lbs.
- » Weight (with solar) 410 lbs.
  - One 12" diameter red circular LED light
  - Two 8" diameter red arrow LED lights
