

ÌBÍLÈ GOVERNANCE

PAPER

HAVE A SAY IN THE FUTURE OF THE ÌBÍLÈ ECOSYSTEM

This is an Introduction to the new \$BLC and NFTs Utility.

We are now moving into the realms of Web3, governance, community induced NFT, and Defi project. In a cordial partnership with Clarity, we are launching our governance portal, where holders of \$BLC token and ìbílèmining NFTs can vote and have their say on proposals submitted by the team on the prospective development and direction of the ìbílèproject.

For each proposal submitted by the team, NFT and token holder voting power are calculated against the amount of \$BLC tokens and NFTs they have in their wallet at that particular time.

Voting power structure

1 \$BLC = 1 Vote

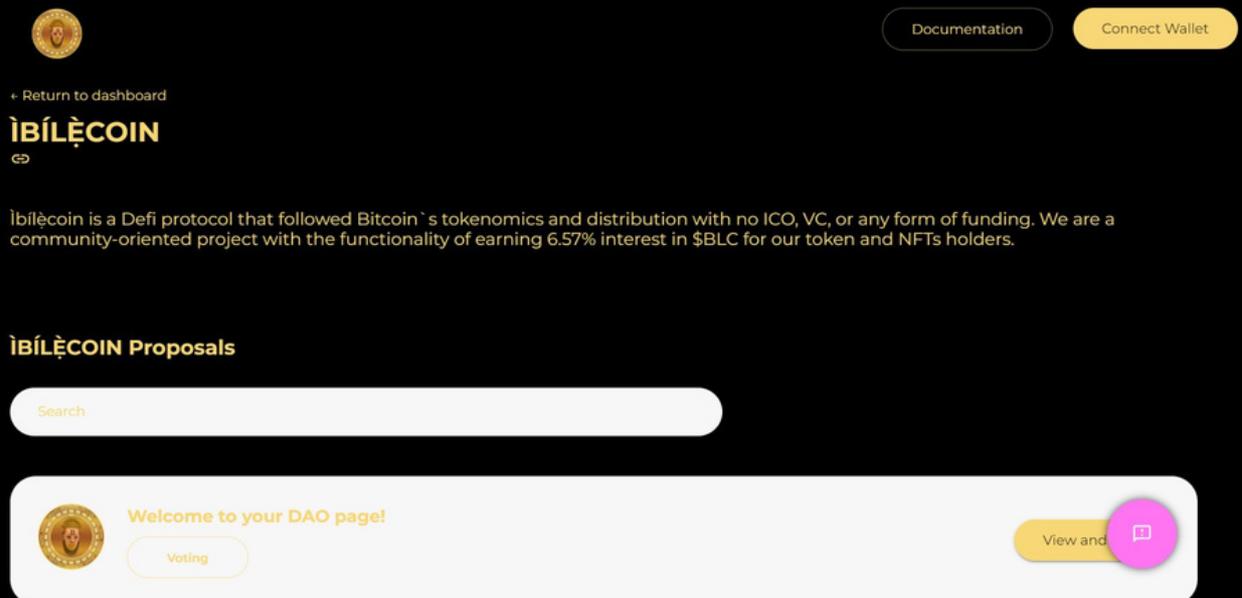

1 NFT = 1,000 Vote

Please note all NFTs have 1000 voting power accordingly, regardless of the class. i.e Gold, Silver and Bronze.

Hence 5 Bronze = 5000 Voting power and likewise 5 Silver = 5000 Voting power and the same with gold.

Here is a snippet of the platform.
