---

## WHITE PAPER

### IBILEGEMS

# INTRODUCTION

Welcome to the world of IBILEGEMS COLLECTIONS. Our NFTs are designed to have the same function as the Traditional Mining machines as we have on Proof of work Networks. I.E BITCOIN [ BTC ]. As we all know that the P.O.W ( Proof of work ) is detrimental to the environment simply by the amount of power it takes to maintain, process and keep transactions and records immutable on the Blockchain. That is the main driving force behind this new way of Mining, how we can revolutionize the process of generating new \$BLC tokens, and keep the ecosystem balanced while driving adoption and utility and at the same time being environmentally friendly, easily accessible, ergonomic, and fit into our decade of Blockchain Revolution.

Total supply :

2000 IBILEBRONZE

500 IBILESILVER

50 IBILEGOLD

# MINNING POWER OF THE NFTS

Gold earns 90 \$BLC / Epoch

Silver Earns 45 \$BLC / Epoch

Bronze earns 18 \$BLC / Epoch

## POLICY I.D

cc0450d757c96c509b1d817b72b2ba963b47e7c4a26d36b5477ffaf6

This is the best way to know you are getting the genuine IBILENFT and MINTING Date 23rd of March 2022 to be 100 % sure, and also the link on our website takes you directly to our official collections page or simply search IBILEGEMS on CNFT.IO look out for the ticked verified logo. Please note according to the current Emission schedule it will take 12.75 years , circa (2035) for all NFTs to be in circulation.

A maximum of 100 NFTs are to be in circulation at launch while the rest will be released Twice a year Q1 , Q4 , hence next 100 IBILEGEMS NFTs release will be September 2022. The price of subsequent IBILEGEMS UTILITY NFTs will be calculated against the value of the BLC TOKEN at the emission epoch.

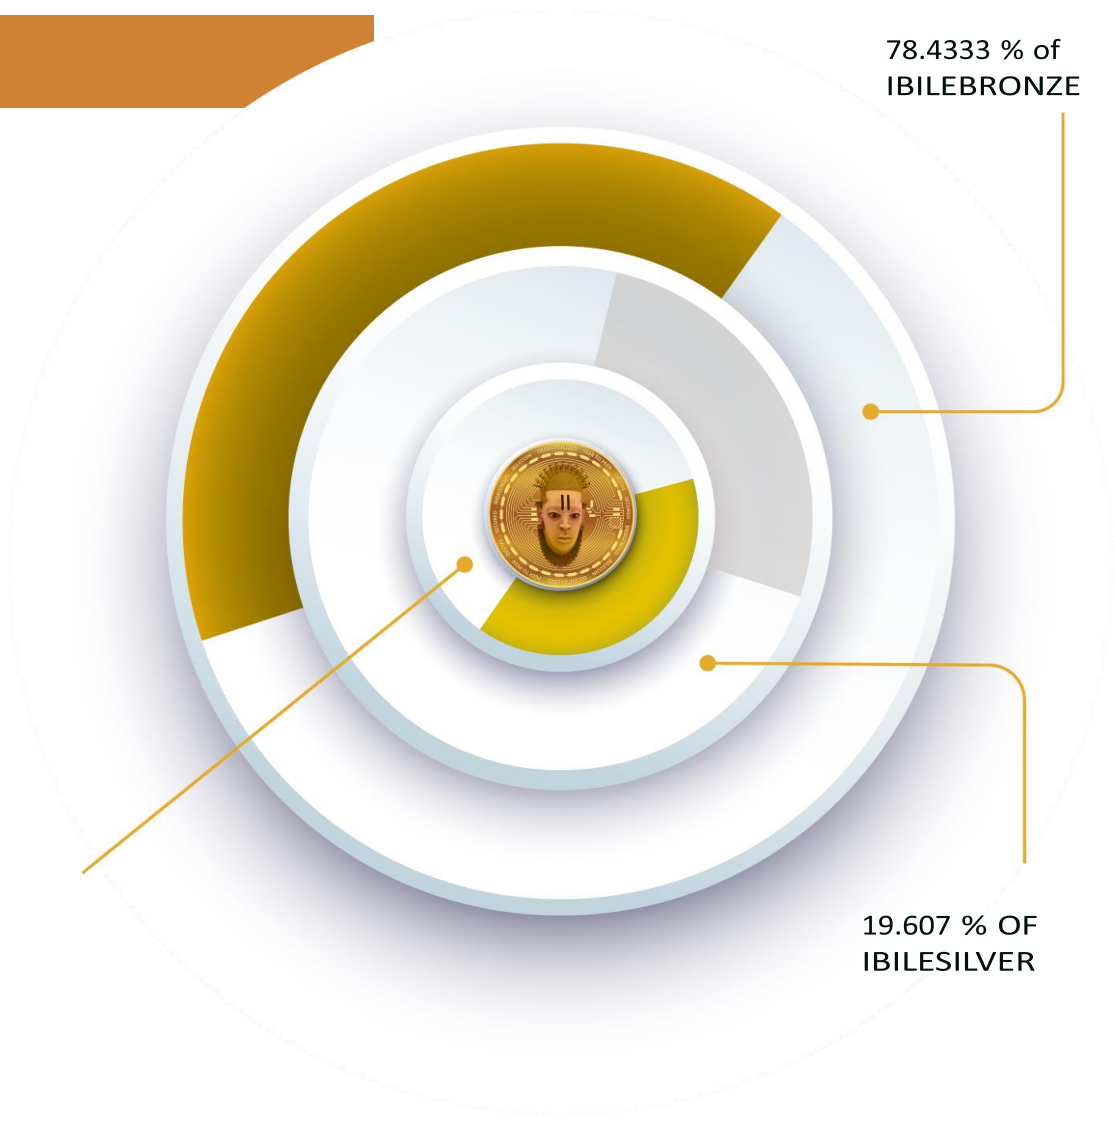

## How IBILENFT MINING works

All you simply need to do is Hold the NFT or NFTS in your wallet and earn the multiples of \$BLC each Epoch while staking your ADA in an I.S.P.O [Independent stake pool operator] pool and claiming your \$BLC tokens via Dripdropz. All in the spirit of true Decentralisation.

# African Gods Non Mining NFTS

COMING SOON!

78.4333 % of  
IBILEBRONZE

19.607 % OF  
IBILESILVER

Name	IBILEGEMS
NETWORK	CARDANO
TOTAL SUPPLY	2550 IBILEGEMS

1.960 % of  
IBILEGOLD.

# ROADMAP

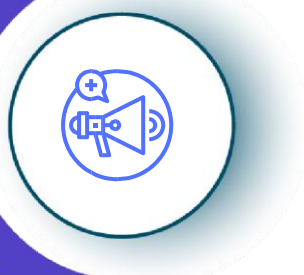

## Q 1, 2022

- Design and Minting of the NFTS
- Maiden distribution of the first "100 . NFT"

## Q 2, 2022

- Mining implementation of the NFTS

## Q 3, 2022

- Second tranche of NFTs Distribution.( September 2022 )

## Q 4, 2022

- African Gods NFTs gets released.

# CONCLUSION

The IBILENTs started with recreating the values most African societies and civilisations lost to Colonialism and Neo - Colonialism on the Blockchain, where it belongs to everyone regardless of their geographical location and where no Government arm can reach. Welcome to our decentralised future on the Cardano Blockchain.

This is the beginning of a new era for decentralized communities. When NFTS literally serve as a work of Art and also as a mining machine which introduce more \$BLC tokens into the ecosystem, creating a balanced ecosystem

it's time for us to begin
