Discharge Summary

Rocko was seen on 12-29-2024 for overall wellness exam.

Rocko was sedate on presentation but his vitals were normal and other than an unkempt coat from living at large outdoors, his exam was unremarkable.

During his visit we obtained the following diagnostics:

Bloodwork (CBC, CHEM, EPOC): normal

4DX: positive for Heartworms (microfilaria noted on slide)

Coagulation times: normal

Thoracic and abdominal radiographs: no obvious abnormalities to report.

At this time, other than his Heartworm status, Rocko appears relatively healthy.

We have sent Rocko home with Doxycycline to start his Heartworm treatment.

Medications to give at home:

Date/Time	Drug Name	Quantity	Instructions
-----------	-----------	----------	--------------

12-29-2024 Doxycycline Hyclate 42 Give 3 tablets by mouth every 12 hours. Give with food or after a meal. Antibiotic. Start with next meal.

Please continue to monitor Rocko closely and if you note:

- vomiting/diarrhea
- lack of appetite
- coughing/sneezing, ocular/nasal discharge
- lethargy, weakness
- labored breathing

and or any other abnormality - then please seek a recheck exam right away.

Please schedule a recheck exam in the morning with your primary care veterinarian to discuss ongoing treatment for Heartworms and general care.

If Rocko was discharged from the hospital with a small bandage on any leg, please remove this bandage 30 minutes after you get home.

If you have any questions, please don't hesitate to call us at 469-287-6767.

We appreciate all your efforts in rescuing animals :).

Thank you for letting us care for Rocko!

Angelique Volkman, DVM

Plan

Angelique Volkman, DVM

Rescue group authorized:

CBC: wnl

CHEM: wnl

EPOC: wnl

4DX: HW positive otherwise negative for some of the more common ehrlichia

PT/APTT: wnl

Radiographs survey radiographs - no obvious changes (no buckshot, no healing fractures, no evidence of bones in the digestive tract (eating wildlife) ; no evidence of disease or trauma, no obstructive pattern.

Plan - heart worm treatment - start doxycycline. C to follow up with rdvm for instigating HW treatment. C to start Panacur at home.

C to monitor closely and if any concerns will seek a recheck exam.

The patient was ambx4 on discharge.

Assessments

Angelique Volkman, DVM

Stray dog just captured in field after being loose for 11 months

Overall healthy dog with heartworms

Physical Exam

Angelique Volkman, DVM

BCS: 3/9

EENT: ou clear, no discharge, au debris but no signs of infection, minimal dental calculus, no nasal discharge, OU vision present, no significant findings.

LN: peripheral LNs are normal in size, and no firm or painful LNs were identified

H/L: normal sinus rhythm, no murmurs auscultated, pulses strong and synchronous; no evidence of increased respiratory rate or effort, bronchovesicular sounds are normal
