

**March 10th, 2018**

Anyone who has had a death or near death experience, has had to at some point, have a reality check of there being heaven and hell and that their eternal destination will be only in one of those two places. [Let There Be Light](#) tells the story of one such atheist individual who has a hard time coming to grip with his. It's an encouraging storyline as we see him coming to Christ and being reunited with his wife and two sons. The part I felt that was weak was when the wife finds out she has incurable cancer. Instead of showing a desire to live, she's portrayed as one who surrenders immediately to the Doctors negative report and just prepares herself to die. There's no sign of prayer for healing or even to believe that God would heal her. Those of us who watched it with disappointed with that as we know that the Bible commands us to pray for the sick to see them healed. It is still a good watch though bringing people to salvation in Jesus.
