

An aerial photograph showing two aircraft flying over a large body of water. On the left is a smaller, white twin-engine turboprop aircraft. On the right is a larger, white four-engine turboprop aircraft. The background shows a coastline with some buildings and a bay. The sky is clear and blue.

URSA SYSTEMS

YOUR MISSION
IS OUR FOCUS

RESULTS ORIENTED GROUND BASED EXPERIENCE

What we offer:

Aviation Services

Mission Systems & Aircraft Support

- Aircraft Systems Provisioning & Modifications
- Contracted Logistics Support
- Airlift Services (Fixed and Rotary wing)

Former Soviet Union Defense Articles

- Rotary Wing Support
- Fixed Wing & Range Services

Mission Support

Security Consultancy

- Advisory and Training
- HEAT (Hostile Environment Awareness Training)
- Penetration Testing
- Operational Support
- Business Support

Expeditionary Construction/Life Support

Aviation Services

URSA Systems brings decades of aviation experience to our worldwide customer base. We have provided aircraft procurement and leasing solutions, full ACMI (contracted air, wet and dry), systems integration to include specialized Mission and Ballistic Systems, and unique materiel support.

Our support packages include both Rotary Wing and Fixed Wing support in both commercial, commercial variant and dual use aircraft.

Mission Systems & Aircraft Support

We are a trusted provider of high-quality, multi-mission Intelligence, Surveillance and Reconnaissance (ISR) products and services with years of experience supporting the Department of Defense and International customers.

Aircraft Systems provisioning & modifications

URSA Systems has extensive Special Mission Aircraft Systems Integration and Aircraft CLS Support Function experience allowing for seamless program support for complex Government and Military programs, extending to Foreign Military Sales (FMS) programs worldwide.

URSA can provide a direct prime contract to end customers, or act as a subcontractor to large prime businesses. Our business model is designed around providing high-quality program and onsite personnel, with direct involvement of Senior Leadership in the Quality Management Plan.

Contracted Logistics Support

In addition to servicing our own fleet of aircraft, we provide contracted services to maintain airworthiness on clients' aircraft, to include both Organizational and Intermediate maintenance.

We provide both fixed base programmatic services as well as on-demand Tiger Teams for AOG situations. Our expertise is in smaller fixed wing aircraft, legacy helicopters and Mi variant helicopters.

Airlift Services (Fixed and Rotary wing)

URSA offers a diverse fleet of helicopters and smaller fixed wing aircraft for contingency and operational needs. Our fleet is based in South Africa with capabilities throughout the continent.

We possess a variety of medium and light lift helicopters (BK117, AS350, MD500E) and smaller fixed wing (DA42-ISR, C208 and PC12).

Additionally we can provide Mi-8 MTV and Challenger Services through partner organisations.

Former Soviet Union Defense Articles

URSA Systems has direct experience in providing foreign systems to support customer requirements for test, training and flight operations. Capabilities include the acquisition, technical support and maintenance of Former Soviet Union aircraft, avionics and defense systems.

Further we specialize in sourcing unique and hard to acquire systems for clients' missions and inventory. Our teams possess the expertise to identify and prevent counterfeit materiel from entering your supply chain ensuring system integrity.

Rotary Wing Support

Ursa has been supplying Mi-17/Mi-8 aircraft services, CLS, systems modifications and parts supply for over a decade. Services include inventory management, deployed maintenance teams and systems upgrades including ballistic protection and avionics improvements.

Fixed Wing & Range Services

URSA supplies a variety of Russian and Eastern European Fighter jet materiel and repair management services. We have multiple certified and confirmed sources of supply for Former Soviet Union munitions for range testing and Aggressor squadron exercises.

Mission Support

Security Consultancy

URSA Systems provides confidential and effective security related services designed to address the needs of Governments, Multi-National Corporations, the Corporate Sector and Prominent Individuals whilst effectively understanding and liaising with third-party supporting stakeholders and local law enforcement bodies. These life-cycle security services include Training & Assessments, Corporate Compliance, Personal/Travel Security & Awareness Training, and development of Corporate policies and procedures to protect company assets and personnel.

Core Services

Advisory and training

URSA understands that clients need to proactively protect both their assets and personnel, we therefore are able to call upon our key experience in both Governmental and Military Intelligence gathering and testing to protect that need in areas such as:

- Strategic, operational, and tactical planning
- Local intelligence research, analysis and detailed risk assessments
- Independent organised crime, internal and external staffing reviews
- Structural reviews and Asset Management
- Threat analysis/penetration testing
- Crisis Management and Contingency Planning.

HEAT

(Hostile Environment Awareness Training)

- Prepare Company personnel to understand and react to Security and Safety situations in hazardous or hostile environments.

Penetration Testing

- Providing a comprehensive Risk Assessment of Companies existing physical security systems.
- Identify vulnerabilities enabling redesign and advise on improving and hardening of all assets and working facilities from your HQ & Offices, Industrial sites, Ports and remote Operational Projects.

Operational Support

Utilising URSA's resource capabilities of former UK, US, and South African Special Forces Operators we can typically deliver:

- Command and control, communications, and intelligence teams
- Former Special Forces Units (covering counter terrorism and organised crime)
- Air evacuation operations and convoy support
- Quick Reaction Forces
- Maritime Asset Defence
- Pilots and Engineers
- Close protection teams
- Combat Medical assistance.

Business Support

URSA can effectively coordinate with local Law Enforcement on behalf of the client with:

- Counterterrorism
- Combating organised crime
- Protection of natural resources and key installations
- Anti-poaching operations
- Anti-smuggling operations and Air Surveillance
- Revenue protection.

Expeditionary Construction/Life Support

URSA Systems provides clients turnkey capabilities to operate near anywhere in the world. We are experienced in designing and delivering full life support, housing/construction, security and deployed health services. Wherever your remote projects take you, we can provide a safe, stable and healthy work environment for your personnel and assets.

Ursa Systems has a long history of expeditionary and engineering services using modern methods of construction. These projects span from singular construction projects and full demobilisation engineering contracts, to full turnkey solutions to establishing base camps and providing the critical infrastructure for complete life support.

In 2015, URSA was awarded the contract for the demobilisation of US\$180m of Mobile Gas Turbines and all ancillary equipment for APR Energy in Libya.

URSA's long experience of operating in hostile environments requiring such high levels of security was a key factor to securing and the successful completion of the APR Energy contract in Libya.

Despite tight time constraints, URSA project managed the decommissioning process at two different sites, mobilised a specialised and skilled workforce from various countries, mobilised all heavy equipment, recorded all assets, packed and loaded all equipment and provided logistical support and security teams from project site to port.

One of the most challenging but rewarding tasks was the organisation of the security support required during the transportation of all the equipment which was successfully completed.

Earlier in 2019, we managed the establishment of a housing and life support program for an international Governmental Client in Central Africa. In addition to the design and construction of a 50-person mancamp, this program involved establishment of remote infrastructure to include power and potable water production, wastewater management, food service and a full MWR (Morale, Welfare and Recreation) package.
