

General Information:

MicroBoost is a unique blend of natural sugars, acids, and enzymes specifically formulated to energize the native soil biology.

Safety - MicroBoost contains only non-genetically modified and naturally occurring ingredients. It is non-toxic to plants and animals. Keep out of reach of children.

Mixing - MicroBoost can be used in conjunction with most fertilizers and herbicides. Mix MicroBoost as close to time of application as possible. Always perform a jar test to ensure tank mixing. Deposition adjuvants may enhance results. Best results occur when sprayed in late evening or early morning, ideally during dew set. Use higher volumes of water if application is above 75 degrees and in sunny conditions.
