*Including but not limited to drip, micro injection, sprinkler, pivot, furrow, boom sprayer, drone, Y-drop, knife, backpack sprayer, watering can, etc.*

- Application Timing Recommendations:

*1-4x per season*

- *Early season growth*
- *After each cutting*

*Livestock/Feed Info*

*Growers Report*

*"After one application on alfalfa, protein, digestibility, and feed values spiked significantly. My new seeding alfalfa had a much greater drought resilience. Quality and yield seemed to increase on every pass and results were visually noted in my first walk into a lush green field of alfalfa 10 days after applying EnSoil Algae™."*

-- Janski Farms | MN

IMPROVE SOIL HEALTH

BOOST NUTRIENT DENSITY

ENHANCE STRESS ADAPTATION

INCREASE RETURN ON INVESTMENT

*"We did not use any fertilizer in the field that got the EnSoil. The alfalfa with algae was taller, leafier, healthier. There was no black stem. It is a very impressive product. We will use it on all of our acres next year."*
