

Bio Ag E

integrated AG
SOLUTIONS

**Activate all essential plant metabolic pathways
for optimal growth, resilience and high yields.**

Intensive agricultural practices have resulted in a substantial decline in biodiversity, adversely impacting both soil health and crop vitality.

Rate & Application

Apply 1 pint to 1 gallon of Bio Ag E in-furrow, on soil, or as a foliar application in early vegetative stages.

- Tank mix compatible
- For enhanced results, pair with AminoCarb or BaCkbone

Benefits:

- 1077 species of beneficial microorganisms in 50 mL
- Reestablish microbial communities in soil
- Bioprime soil through 16 nutrient pathways
- Balanced fungal to bacteria ratio stacked with protozoa
- Contains bacterial phages: natural predators to pathogenic fungi and bacteria
- Microbial stress adaptation
 - Salinity, heavy metals, heat, drought, etc.

Not Applied

Not Applied

Where should I use Bio Ag E?

- Heavily manured ground
- High disease pressure
- Cool/cold planting conditions
- Low/unbalanced fertility
- Salinity or heavy metal issues
