

2025 EnSoil Irrigated Corn Trial Conducted by Performance Crop Research in Great Bend, Kansas

Corn Stand Count

Trial Location:
Great Bend, KS

CRO:
Performance
Crop Research

Trial Description:

This trial was conducted as a randomized complete block design with one replication. Plots size was 10 ft by 30 ft (300ft²). Row spacing was 30 inches.

Application Description:

EnSoil was applied three times, including as a broadcast treatment tank mixed with pre-emergent herbicide, a second application tank mixed with the post-emergent herbicide, and a third application tank mixed with a fungicide.
