

# BIOGREEN

## Nutrient Stabilizer

### About Biogreen

BioGreen is a fast-acting microbial formula that stabilizes nutrients, promotes growth, and supports plant detoxification. Made with Pursanova activated water, it penetrates deeper into soil and plant tissues for better nutrient absorption.

It enhances the fixation of key nutrients—Nitrogen, Phosphorus, Potassium, and Calcium—while improving soil health for better uptake of Boron, Zinc, Copper, Selenium, and other trace minerals.

### Key Benefits:

- ✓ Reduces the need for synthetic Nitrogen fertilizers.
- ✓ Assists in the conversion of available Phosphorous.
- ✓ Promotes photosynthesis and fruit fill.
- ✓ Improves capillary uptake and metabolic pathways.
- ✓ Reduces pathogenic disease pressure.
- ✓ Improves water holding capacity.

### 2 YEAR AVERAGE:

### Why Choose Us?

Physagro harnesses physics-based solutions and Pursanova activated water technology to naturally detoxify soils, enhance nutrient uptake, and promote healthier, more productive crops. .
