PERENNIAL

CONSTRUCTION & INDUSTRIAL SERVICES, LLC

Civil

PCIS provides cost-effective, efficient plant civil services including dirt work, grading, concrete, and structural. Our team will work with you to understand your specific needs and then deliver a solution. Timely installation will ensure your operation is minimally impacted. Our team will keep you updated on work progress ensuring that the final installation exceeds your expectations. PCIS offers diverse construction services, including but not limited to Civil Construction, infrastructure, general contracting, commercial, industrial facilities construction, site improvement, and turnkey construction. PCIS has developed a reputation for completing projects on time and within budget.

Mechanical

PCIS offers maintenance turnaround and capital program services in chemicals, refining, and manufacturing. Our team provides equipment installation, equipment replacement, repairs, field modifications, and equipment/piping demolition. We provide quality field and shop fabrication to support your maintenance and capital projects both large and small. Our team is supported by shop crafts that supply pipe and structural fabrication support. Our expertise includes but is not limited to Modular Construction of Process Equipment, Skid Mounted Compressor Packages, and Pipe Racks.

Commissioning

PCIS experienced staff of Engineers and Operation Specialists work with the Owner's Operations & Mechanical team for a Safe Startup of all equipment. The successful completion of the Commissioning Phase in any project is critical to check and double check that the plant is ready to move to Startup. It is vital to assemble a reliable team that has the mechanical and operational experience to assure that all systems and components have been installed properly and the plant is ready for the Startup phase.
