

Paradise Hollow Farm

Updated Pasture-Raised Chicken Pricing

We've rethought our pricing to bring the most value to our customers. We are still delivering the same high-quality chicken raised the same way but with better prices.

Our chickens are raised naturally with no vaccines or antibiotics. We nurture each batch in clean brooders until they're ready to head out onto pasture—where they immediately begin foraging in our mobile chicken tractors. Daily moves onto fresh ground keep them healthier and cleaner, while regenerative grazing rebuilds our soil and nurtures biodiversity. It's chicken raised the right way for the earth and for you.
