

Oliver

Oliver is a Great  
Horned Owl. He  
hunts from our  
raptor perches.

Oliver helps us when  
he hunts and eats  
rodents.

He provides food  
for his family.

Oliver has a favorite perch. On most nights, he jumps on and off the perch between 8:00 PM - 9:30 PM.

I think a lot  
about Oliver.

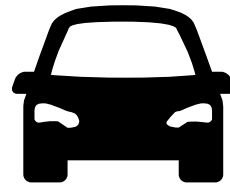

He's my wild friend!

I also think about all of our wild friends that work with Oliver to keep us in balance with nature.

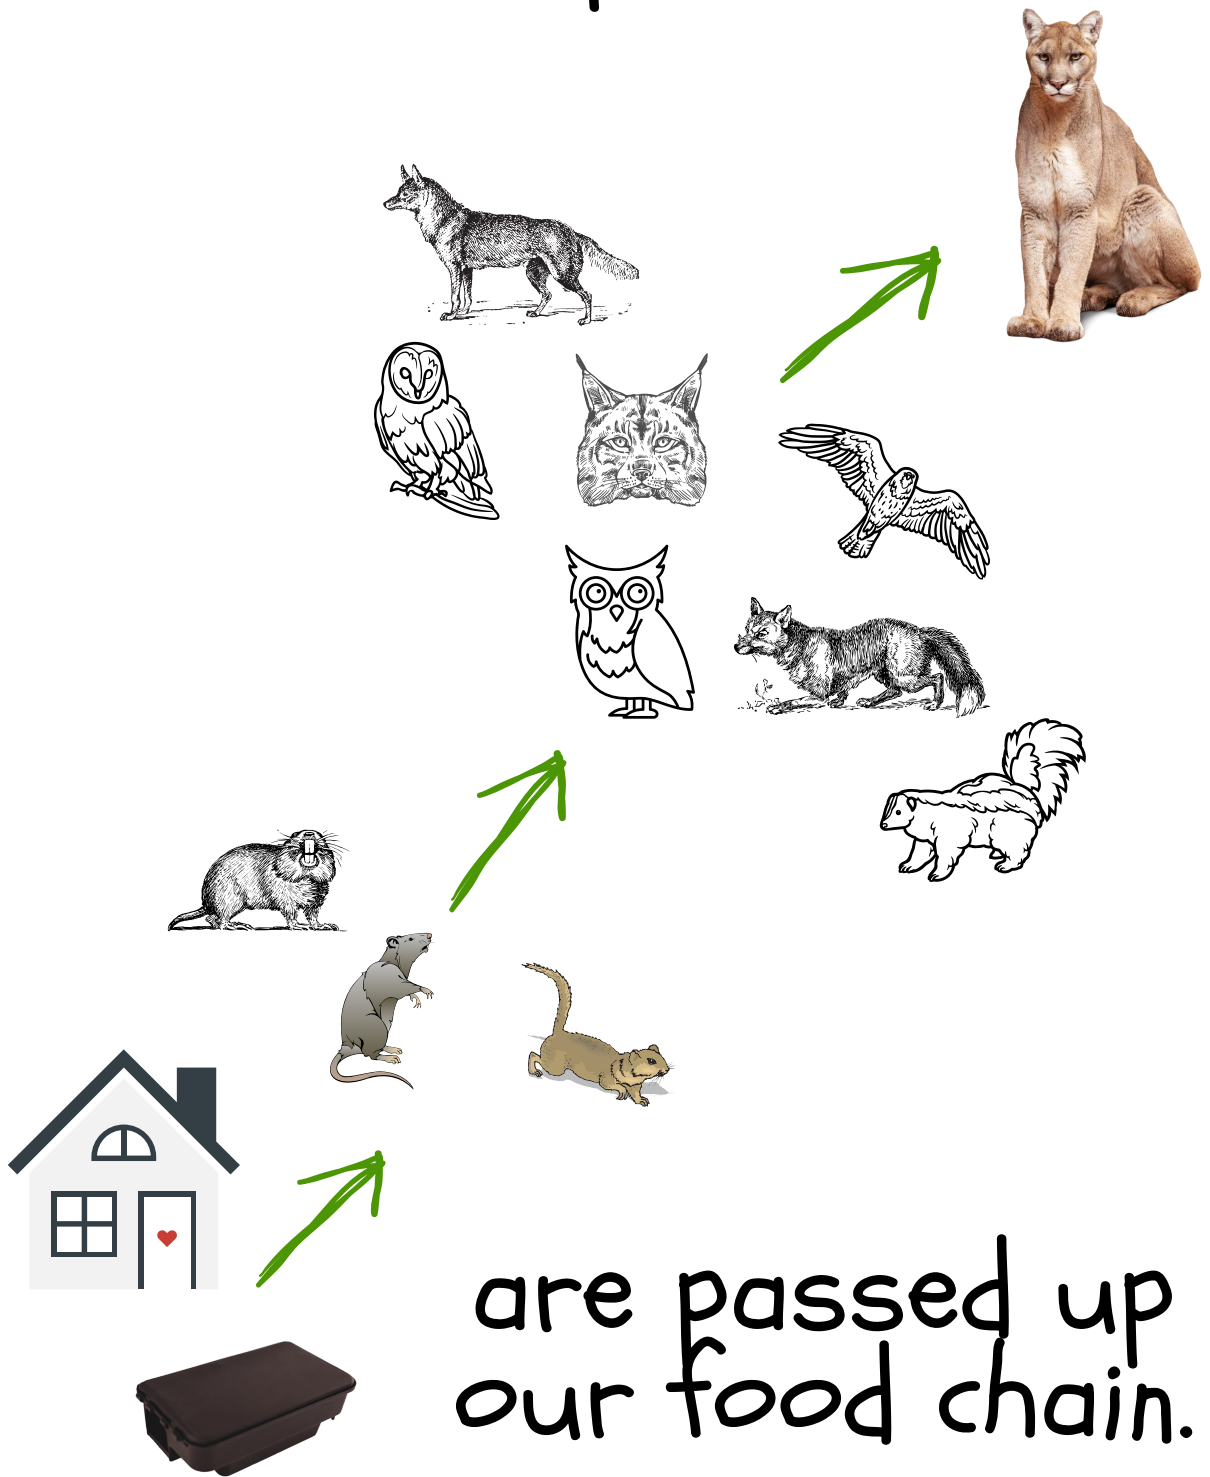

Sometimes people use  
rodent poisons

**HELP!**

because  
they have a  
problem  
with  
rodents  
and they  
don't know  
what to do.

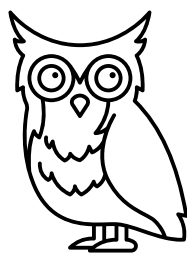

# They do not know that rodent poisons

We are here to help  
people.

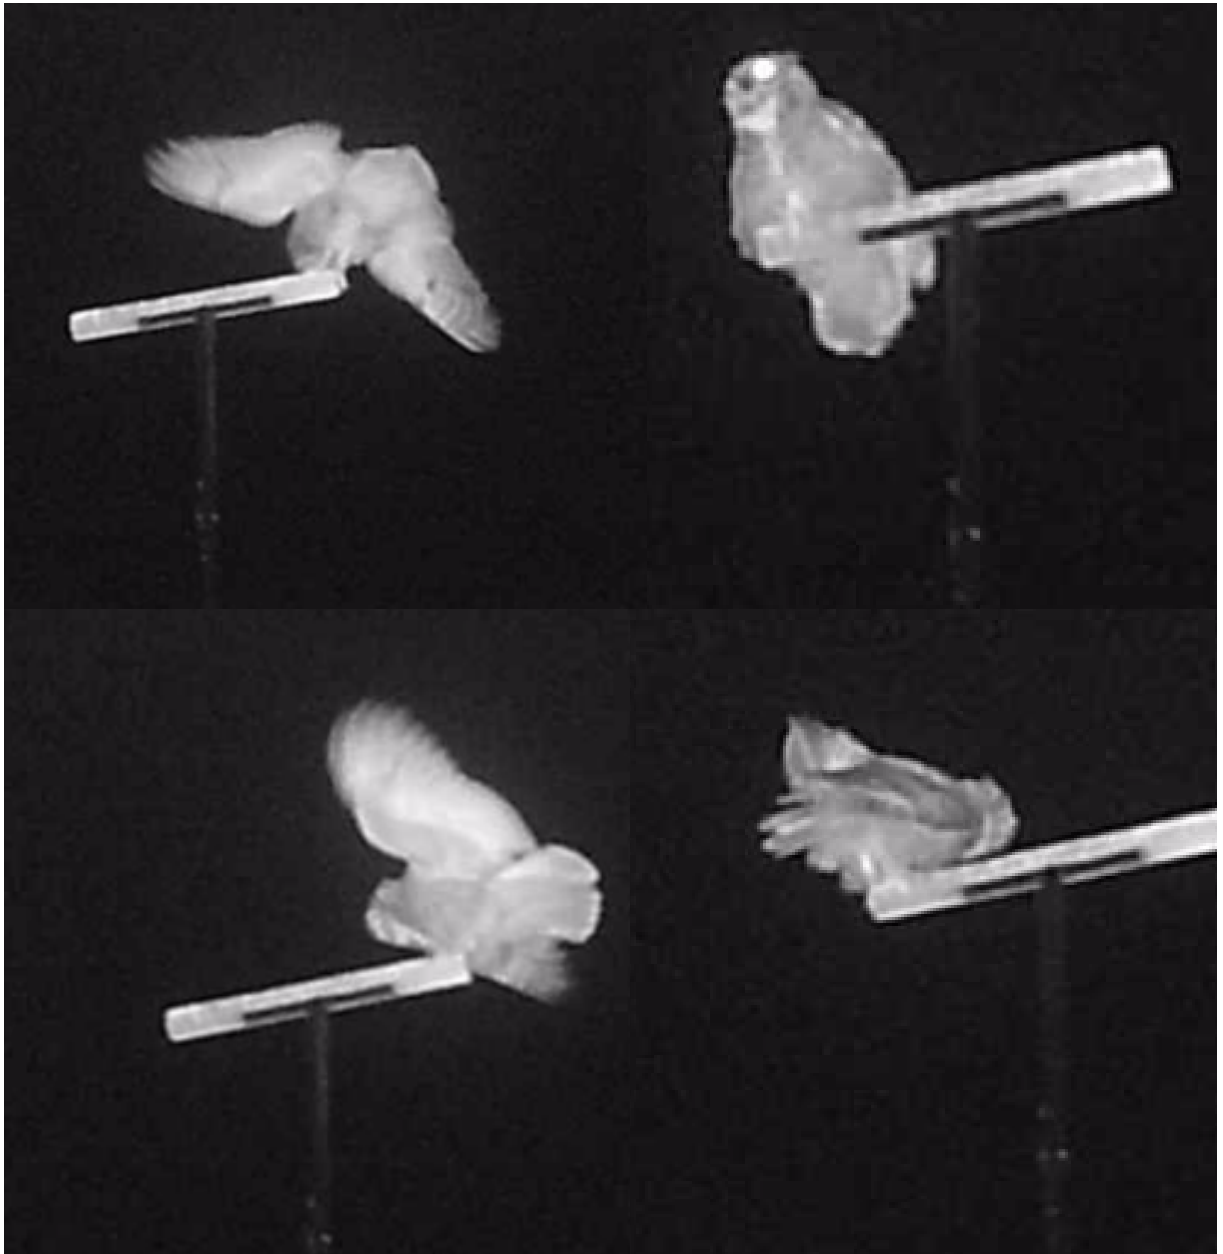

Sometimes when we  
talk to people, they  
feel bad because they  
didn't know how  
rodent poisons impact  
wildlife like Oliver.

We provide education and put up signs and billboards. We also participate in fairs, races, and other events! We have fun helping people and wildlife - like Oliver! Sometimes I even dress up as a giant owl.

Here are more pictures  
of Oliver!
