

Pfect-A

**EXOMEDI
CELL RENEWAL
EXOSOME**

INTRODUCTION

Derived from hUMSC or Human Umbilical Mesenchymal Stem Cell Conditioned Media Extract.

Offering the full benefits of rejuvenating skin booster that focuses on defying age, improves skin texture, improves skin tone, improves skin laxity, reduce skin inflammation, and overall enhance skin health and appearance.

EXOSOMES

It is a tiny vesicles carrying all the benefits of stemcells, like Growth factors, proteins, and bio active molecules.

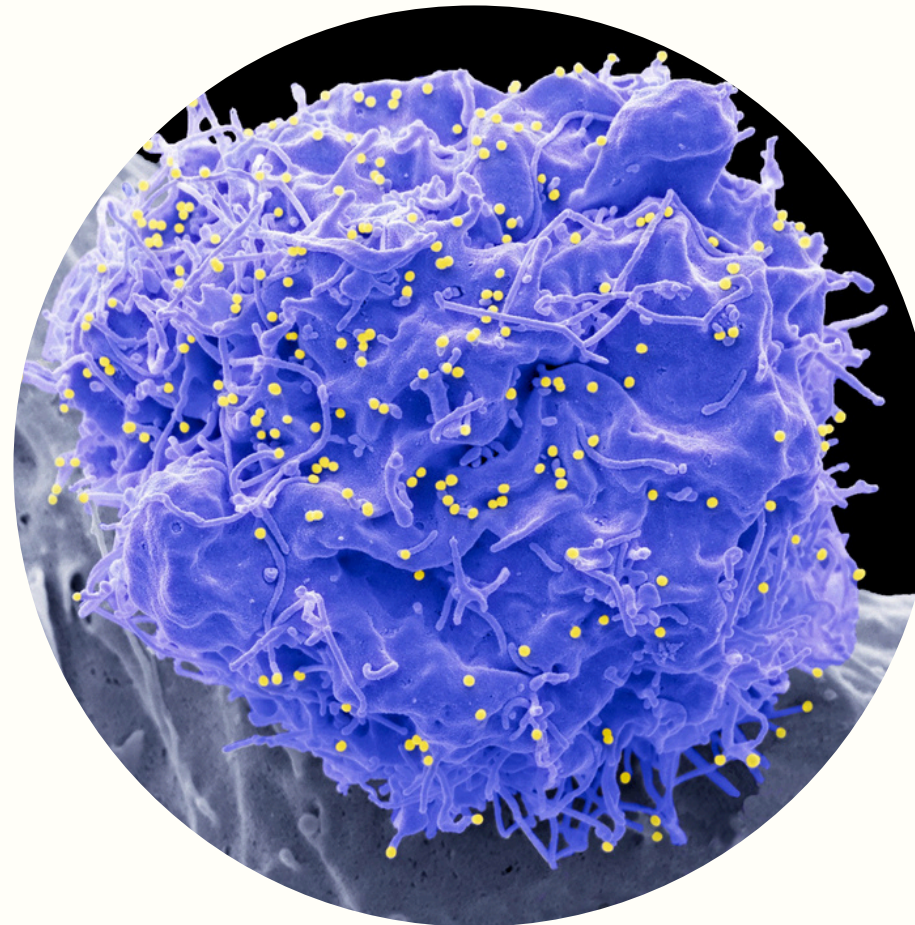

1

It can penetrate the skin due to its molecular size and brings all of the benefits it carries deeper into the skin.

2

Exosomes are excreted only by another cell. I.E Plant cells, Umbilical cord, placenta and many more.

3

4

Exosomes have more growth factors than PRP.

5

Exosomes are exclusive, and expensive due to its complex property.

6

Safe & Effective for Dermatological use.

USES

Exomedi can be applied and used with mesotherapy, intradermal injection, microneedling and derma stamps.

Initial

One session every 2 weeks for the first 4 sessions.
