

- 2) The 200A detector with 1/4-amp filament was introduced after this set went out of production. The 200A will work and could have been installed as a replacement. A 201 or 201A could also be used as the detector.
- 3) Filament polarity (F+ and F-) reflect the connections in this unit and may differ from generic documentation.
- 4) Numbers on transformer windings are DC resistance in ohms.
- 5) The phone condenser measures 600 pf in the units examined. No monimal value exists in the literature.

This schematic is 11" x 17"

PRELIMINARY

The information presented is believed to be correct. However, it is subject to revision at any time.
