

# Model 2 Detector Receiving Set

RECEIVING RADIUS 600 MILES

**\$22.35**  
Complete

Licensed under Armstrong Regenerative Patent No. 1,113,149 for amateur and experimental use only.

## Single Tube Regenerative Set

In this set we offer at the low price of \$22.35 a combination that our actual tests have proven will equal and often surpass the results obtained with sets selling for considerably higher prices. High grade parts, embodying late developments in radio engineering, have been assembled into a neat, compact cabinet. The wiring is the well known Armstrong Regenerative Circuit, the set being licensed under the Armstrong patents, as indicated above. The tuning adjustment of this receiver is accomplished with two controls, one the variable condenser connected in the antenna circuit, which selects the desired wave length, and the other the regenerative feed back control, which governs the degree of intensity. This makes the set a remarkably simple one to operate. The wave length range is from 300 to 600 meters. All the broadcasting stations transmit on wave lengths within these limits. The battery and phone connections are all plainly marked. The set is furnished complete with tube, phones, batteries, aerial and ground connections as illustrated ready to install and includes full directions for installation and operation. Shipping weight, 20 pounds.

**57A9366** .....\$22.35

**57A9368**—Same as above with tube, phones, and batteries, but without aerial and ground connections. Shipping weight, 18 pounds.....\$21.05

**57A9363**—Cabinet only, with tuner, rheostat and socket, but without tube, batteries or accessories. Shipping weight, 8 pounds.....\$12.75

## Model 2A—Two-Stage Amplifier

For those who wish to use a loud speaker, we can furnish a two-stage amplifier to match the above detector unit. This will increase the receiving radius and will bring in nearby stations clearly on any satisfactory type loud speaker.

**57A9367**—Complete with two Type "C" 12 or W. D. 12 tubes, two dry cells and one 22½-volt B battery. Shipping weight, 18 pounds.....\$29.50

**57A9368**—Cabinet only, with transformers, rheostats and sockets, but without tubes or batteries. Shipping weight, 6 pounds.....\$18.75

## "LISTEN IN"

The Air Is Alive With Voices.

Almost any time of the day or evening you are able to hear:

**Music**—vocal and instrumental selections by great artists, operas, concerts, dance music, etc.

**Lectures**—the words of famous orators and statesmen who talk to you over the radiophone on everyday problems.

**Church Services**—are being broadcast Sunday morning, afternoon and evening from many churches in our larger cities.

**News of the Day**—local, state, national and foreign news, election returns, happenings in the sporting world, etc.

**Farmers' Market Report**—daily market reports on farm produce; also the latest quotations on stocks and bonds.

**Weather Report**—official reports on weather conditions throughout the country and forecasts for the next day.

**Bedtime Stories**—the telling of pleasant tales for children as bedtime draws near.
