

KEM 7-11

Technical Data	Sanitizing & Deodorizing Polishing Cleanser			
	DESCRIPTION:	Emulsified controlled abrasive cleaner, green, anise odour.		
USED FOR:	Kem 7-11 is a creamy sanitizing deodorant and polishing cleansing agent for many different surfaces. It is used for removing rust, soap film, organic despoits, oxidized films, oils and greases, metallic deposits, on cabinets, sinks, basins, urinals, chrome and fibreglass, surfaces in restrooms, and other areas commonly found in hotels, schools and commercial buildings.			
ADVANTAGES:	<p>Kem 7-11 is also used in marinas to brighten up chrome work on fittings and to renovate fibreglass surfaces. It is acid free and it will not damage surfaces when used as directed. It is non-corrosive in storage and use and does not produce toxic fumes.</p> <p>4-way cleaning action - Kem 7-11 cleans, polishes, deodorizes and sanitizes with each application. It is biostatic.</p> <p>Safe - Kem 7-11 will not harm surfaces when used as directed.</p> <p>Acid Free - Kem 7-11 contains no acids, making it safe to hands and harmless to clothing or fabric.</p>			
DIRECTIONS:	<p>Kem 7-11 may be applied directly on the surface or applied with a damp sponge or brush. For heavily embedded soil, clean clean with a brush. Light soils are removed easily by rubbing lightly with a sponge. Wipe off with a clean cloth, or clean damp sponge.</p> <p>Note: When using on stainless steel, apply with grain or surface my be scratched.</p> <p>CFIA approved</p>
