

Technical Data

IODOPHOR DISINFECTANT - CLEANER- FUNGICIDE

DESCRIPTION: Clear liquid, amber-red, odourless

USED FOR: Disinfecting, cleaning and killing of a wide range of micro-organisms on walls, floors, sanitary fixtures, locker rooms, shower stalls, washrooms, foot baths, poultry crates, animal cages etc.

ADVANTAGES: Non irritating to skin; non-toxic, non-staining.
Free rinsing, completely water soluble.
Wide range kill of micro-organisms - max biocidal efficiency
Retards the spread of fungi infections (including athlete's foot)

DIRECTIONS: **Initial Disinfection:** Use 140 ml TRL-13 per 4.5 litres water. Apply to thoroughly cleaned surfaces with mop or cloth. Remove excess solution and allow to dry.
Regular Disinfection: Use 70 ml TRL-13 per 4.5 litres water. Treat as above.
Regular Disinfecting & Cleaning of Lightly Soiled Surfaces: Use as above.
Foot Bath Trays: Fill tray with solution. Empty and refill daily
Poultry Crates: Spray or immerse in solution after each use and allow to drain and dry. Treat all crates prior to returning to point of origin.
Animal Cages: Follow procedure for initial & regular disinfecting.
Food Surfaces: Follow procedure for initial & regular disinfecting. If surfaces are subject to direct food contact, adequately rinse with potable water following cleaning.

NOTE: Do not dilute in water hotter than 50C.
Do not mix with soap solutions.
Colour loss provides indication when disinfecting power of solution is spent.

DIN 481637
CFIA approved
