# Here is a tip to remember

Division:

dividend

divisor

$$21 \div 7 =$$

3

quotient

The diagram illustrates the components of a division equation. A box labeled 'dividend' has an arrow pointing to the number 21. A box labeled 'divisor' has an arrow pointing to the number 7. The number 3 is positioned below the equals sign, with an arrow pointing up to it from a box labeled 'quotient'.

# What is division?

Division is breaking a larger number into smaller, equal-sized groups. It's the opposite of multiplication, where you combine groups to make a larger total.

$$15 \div 5 =$$

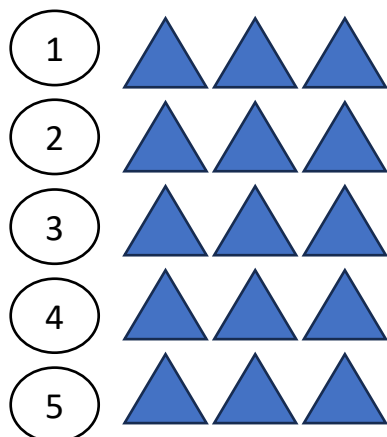

There are 15 triangles. How many equal groups of 5 can you make?

$$15 \div 5 = 3$$

$$15 \div 3 =$$

There are 15 triangles. How many equal groups of 3 can you make?

$$15 \div 3 = 5$$
